Catherine Teel, Counselor

Martha Mendoza, Counselor

Gregory-Portland High School

MOTTO:

Challenging the leaders of tomorrow!

HIGH SCHOOL MISSION:

To provide a challenging environment where all students will experience academic and cultural opportunities that result in creative, disciplined, and productive life-long learners with strong character and a commitment to community.

Intent of this Guide

The provisions and information set forth in this Course description Guide are intended to be informational and not contractual in nature. The District hereby reserves and retains the right to amend, alter, change, delete, or modify any of the provisions of this guide at any time, from time to time, in any manner that the Administration or the Board of Trustees of the District deems to be in the best interest of the students of this District. The contents of this guide apply to all students and programs in the District and do not amend, abridge, or replace Board policies or administrative regulations established by the District.

ACHIEVETEXAS INITIATIVE

The high school curriculum in the Gregory-Portland Independent School District is designed to meet the needs of students preparing for college, careers, and citizenship in the community. Gregory-Portland High School offers a full range of courses, advanced academics, and a comprehensive array of Career and Technical Education programs. All GPISD students are expected to prepare for both college and careers.

AchieveTexas

All Gregory-Portland High School students have the opportunity to focus their high school elective course choices in a field of interest. The AchieveTexas model of career planning is an initiative designed to prepare students for a lifetime of success. It allows students to achieve excellence by preparing them for secondary and postsecondary opportunities, career preparation and advancement, meaningful work, and active citizenship.

AchieveTexas is a program designed to help students (and their parents) make wise educational choices. It is based on the belief that the curricula of the 21st century should combine rigorous academics with relevant career education. When schools integrate academic and technical education, students can see the “usefulness” of what they are learning. The system also facilitates a seamless transition for secondary to postsecondary opportunities.

The initiative utilizes Career Clusters as the foundation for structuring how schools arrange their instructional programs. A Career Cluster is a grouping of occupations and broad industries based on commonalities. The Clusters provide organization for Career Pathways and Programs of Study that represent a recommended sequence of coursework based on a student’s interest or career goal.

Goals of AchieveTexas

- Every student prepares a personalized graduation plan for grades 9-16 and beyond. The student chooses a Career Cluster and a Program of Study to guide his or her learning in the context of personal career interests. Plans are evaluated and updated annually.
- Career concentrations in high school help students transition into career preparation in postsecondary. All participants experience career advancement and employment.
- The education system is seamless between high school and postsecondary institutions. Students have opportunities in a Program of Study to earn dual credit and articulated credit that flows seamlessly into postsecondary education or training.
- Academics are woven throughout the curriculum. There is an integration of academic and technical knowledge and skills within the curriculum. Interdisciplinary teaching takes place and academics are taught in context.
- Career guidance is dramatically enhanced. All students have access to quality assessment and career information resources. Career counseling is provided with a strong emphasis on career and college readiness.

AchieveTexas uses the current high school graduation program as a foundation and focus, and integrates electives in a coherent sequence to build student skills in an area of interest. Students are encouraged to take Pathway courses in a coherent sequence to maximize the effectiveness of the learning. Teachers and counselors will be able to help students review interests and skills to determine which pathway to choose.

2014-2015 Graduation Credit Requirements

Discipline	Recommended 26 Credits	Distinguished Achievement 26 Credits & Advanced Measures
English/Language Arts	<p>Four Credits: *English I *English II *English III The fourth credit of English may be selected from any of the following: -English IV -AP English Literature and Composition -English IV Dual Credit</p>	<p>Four Credits: *English I *English II *English III The fourth credit of English may be selected from any of the following: -English IV -AP English Literature and Composition -English IV Dual Credit</p>

Graduation Options

State and National Standards

Gregory-Portland High School curriculum offers courses taught at or above prescribed State and National Standards. Teachers provide instruction as outlined in the Texas Essential Knowledge and Skills (TEKS) and work to prepare students for the State of Texas Assessment of Academic Readiness (STAAR) exams as well as Advanced Placement exams.

GPISD will make every effort to support transfer students from out of state and from other Texas districts in receiving educational opportunities that ensure graduation with their age appropriate peers.

Recommended High School Plan (RHSP)

Gregory-Portland High School offers the recommended plan for graduation. A student must complete the core courses which include: English, Mathematics, Science and Social Studies. Two years of the same language other than English are also required, as well as the requirements listed on the “Graduation Credit Requirements” charts (pp.2-3). All students who graduate from Gregory-Portland High School are eligible to apply for the Texas Grant for college and receive the honor of being a Texas Scholar.

Distinguished Achievement Program (DAP)

To graduate under the Distinguished Achievement Program, a student must complete all Gregory-Portland High School required course credits for the Distinguished Achievement Plan plus any four combinations of the advanced measures noted below.

These measures must focus on demonstrated student performance on the college or professional level.

Example 1: Score of three or better on two Advanced Placement (AP) examinations; successful completion of one college course and one research project. Example 2: Score of three or better on four AP examinations. (see pg.8 for AP information)

Advanced Measures

- Original research/project that is:
 - Evaluated by a panel of professionals in the field that is the focus of the project, or
 - Conducted under the direction of mentor(s) and reported to an appropriate audience

Note: This measure may not be used for more than two of the four advanced measures in meeting the requirement of the Distinguished Achievement Program.
- Test data:
 - Achievement of a score of three or above on a College Board Advanced Placement examination,
 - Achievement of a score on the PSAT that qualifies a student for recognition as a Commended Scholar or higher
 - by the National Merit Scholarship Corporation,
 - or as part of the National Hispanic Scholar Program of The College Board,
 - or as part of the National Achievement Scholarship Program for Outstanding African-American Students of the National Merit Scholarship Corporation.

Note: The PSAT score may count as only one advanced measure regardless of the number of honors received by the student.
- College academic courses:
 - Achievement of a grade of 80 or higher on college academic courses, including those taken for dual credit, and advanced technical credit, including locally articulated courses.

Note: Tech Prep courses may not be used for more than two of the four advanced measures in meeting the requirement of the Distinguished Achievement Program regardless of the number of such courses undertaken.

Graduation Requirements for Students Receiving Special Education Services

Graduation Method I for Students Receiving Special Education Services

- a. A student receiving special education services may graduate and be awarded a high school diploma if the student has satisfactorily completed the district’s least curriculum and credit requirements for graduation

applicable to students in general education, including satisfactory performance on the exit-level assessment instrument (STAAR).

- b. A student receiving special education services may graduate and be awarded a high school diploma if the student has satisfactorily completed the district's least curriculum and credit requirements for graduation applicable to students in general education and has been exempted from the exit-level assessment instrument (STAAR).

Graduation Method II for Students Receiving Special Education Services

A student receiving special education services may graduate and be awarded a high school diploma if the student has satisfactorily completed the district's least curriculum and credit requirements for graduation to the extent possible with modifications/substitutions only when it is determined necessary by the admission, review, and dismissal (ARD) committee for the student to receive an appropriate education applicable to students in general education who have been exempted from the exit-level assessment instrument (STAAR). The ARD committee must also determine that the student has successfully completed the student's individual education program (IEP) and has met one of the following conditions:

- a. Full-time employment, based on the student's abilities and local employment opportunities, in addition to sufficient self-help skills to enable the student to maintain the employment without direct and ongoing educational support of the local school district.
- b. Demonstrated mastery of specific employability skills and self-help skills which do not require direct, ongoing educational support of the local school district.
- c. Access to services which are not within the legal responsibility of public education, or employment educational options for which the student has been prepared by the academic program.

Graduation Method III for Students Receiving Special Education Services

The student no longer meets age eligibility requirements and has completed the requirements specified in the Individualized Education Plan (IEP).

Note: For students who graduate through Graduation Method II A, B, or C, the ARD committee shall determine whether educational services will be resumed upon request of the student, as appropriate, so long as the student meets the age eligibility requirement.

Graduation with a high school diploma under Graduation Method I A or B terminates a student's eligibility for special education services.

Graduation Ceremony

There will be one formal graduation ceremony held in May. A fall graduate or a three year graduate may participate in May graduation ceremonies. A fall graduate must notify the principal on or before March 1 of the spring semester of his/her intent to participate.

Graduation Through Acceleration (Three-Year Graduates)

It is strongly recommended that students who wish to graduate through acceleration apply as early as possible in their high school career to facilitate appropriate planning. Therefore, students should apply no later than the **September 15 of their junior year**.

Graduation through acceleration may be accomplished by following district policy and completing graduation requirements through:

- Normal academic-year coursework,
- Credit by Exam without prior instruction (see School Board Policy EEJB, and Student-Parent Handbook),
- Summer school courses, and/or
- Correspondence courses.

Students will receive credit on transcripts for courses taken through these methods. Grades achieved will not be utilized to calculate the student's GPA or class rank. Weighted or Dual Credit courses taken during the summer do not count in class rank or to calculate GPA. Please see your counselor regarding early graduate scholarship. A student who has applied for early graduation, may reverse that decision with written parent permission and principal approval.

Parent and Student Information Regarding the SAVE Committee Process

For several reasons it is important that students and parents carefully plan the course selections for each semester and year. Most importantly, students should question and explore the content of a course option before making and submitting a choice. Jumping from course to course during a semester interrupts the learning process and does not help students learn thoughtful decision-making, commitment, and perseverance. Secondly, master schedules are developed in the spring prior to the upcoming year. Selections during registration indicate how many teachers and sections will be needed for each course. This process allows administrators to plan and to hire for optimum academic excellence and success.

When students are permitted to randomly change schedules, classes can become overcrowded and imbalanced. Many students can be affected. Even the most effective planning is compromised since it is very seldom that a one-course change affects only one course. Careful selections benefit everyone. Thank you for being a crucial part of the high school educational team as everyone works together for academic excellence.

- Registration
 - Parent and student informational meetings will be held during spring registration.
 - Students will be guided through course selection during registration.
 - Students who do not submit a registration form will have a schedule arranged for them by their counselor according to their academic needs and/or graduation plan.
- Add/Drop Date
 - **A Course Selection Verification Form will be mailed to each student at the completion of registration.**
 - **A student who does not submit a change to the Course Selection Verification Form by the add/drop date will not be eligible for a course selection change.**
 - **Only course selection changes pertaining to graduation plans and/or computer errors will be addressed during the following year.**
- SAVE Committee Process
 - Schedule changes that are requested after the add/drop date and that only affect core classes will be addressed through the SAVE Committee process.
 - Schedule change requests for elective classes will not be considered after the add/drop date.
 - After conferencing with the student's teacher, the student and/or parents may make application with the counselor to request a SAVE Committee meeting.
 - The SAVE Committee is chaired by the counselor and is composed of the student, the parent/guardian, the teacher whose class the student is requesting to exit, the department chair (if necessary), and an administrator.
 - The SAVE Committee process becomes an option on the sixth day of the course.
 - Every effort will be made to "save" the student's schedule.

Prepare for Post-Graduation

Always choose the courses which are most rigorous and challenging for you. High school is not just something you have to get through. It is the foundation for college and your life work.

It is not too early to start thinking of colleges, universities, and/or trade or technical schools which you would like to attend. The high school counselors will help you in your search. See your counselor for further information.

9th Grade: Get to know your counselor by signing in on the form provided in the Guidance Office. Visit the Guidance Office and library to discover available resources. Take advantage of meeting college representatives when they visit GPHS, attend Coastal Bend College Night, take the PSAT, and begin to develop a list of all your activities, awards, and honors (a student résumé).

10th Grade: Continue gathering college and career information. Utilize career and interest software in lab. Apply for summer college programs for high school students and participate in summer enrichment activities. Share your interests and concerns about college with your parents and your counselor. Take the PSAT. Add to your student résumé.

11th Grade: Take the PSAT in October. Take the ACT or SAT in spring or early summer. If not exempt, take the THEA if planning on taking any dual credit courses. If possible, visit some of the college campuses which you are considering attending. Talk to college students and ask them questions about college. Visit the GO Center. See your counselor about procedures for applying to military academies if interested. **Update your résumé.** Spend time planning and writing essays for college admissions.

12th Grade: Repeat college entrance exams if scores need to be increased and take the THEA test if not exempt. Narrow down your list of colleges; **keep in mind costs**, admissions requirements, academic offerings, your interests, strengths, and weaknesses. **Meet Deadlines!** Apply for scholarships for which you qualify listed in Senior Guidance Newsletter, on the Internet and from other available sources found in the library. **Meet Deadlines!** Complete and submit at least two or three applications to schools for which you meet the entrance requirements. Complete your résumé and give a copy to your counselor. Complete the FASFA as soon after January 1 as possible.

Grading System

A minimum semester average of seventy percent (70%) is required in order to receive credit in a course; however, both passing and failing grades are used in computing grade point average. In a one credit class, the first and second semester averages are averaged together to give the student the opportunity to receive full credit, even with one failing semester grade.

A student's cumulative Grade Point Average (GPA) is figured by averaging each semester's grades.

Credit for an individual semester shall be earned by a student who earns a passing grade for one semester, but whose combined grade for the two semesters is lower than 70. In this circumstance, the student shall be required to retake only the semester in which the failing grade was earned.

Credit for both semesters of a two-semester course shall be earned by a student when the combined grade for the two semesters is a 70 or higher, even if the grade earned in one semester is lower than a 70.

When AP, Pre-AP or other weighted classes are taken, each of those class semester grades is multiplied by 1.1 and the weighted average is used to figure the GPA for that semester. Weighting of AP, Pre-AP, Dual Credit, or any course designated as a weighted course is awarded only when a student completes the full semester of a one-semester course or both semesters of a two-semester course [Credit Recovery Learning Lab, Alternative Education Courses (WLC), courses identified as acceleration courses, zero hour, night school, credit by examination (with or without prior instruction), summer school, courses not recognized by TEA, courses taken at the college or university campus for college credit only, courses taken at the junior high campus, and correspondence course grades are not used in computing GPA.]

Promotion Standards / Grade Level Classification

Credits earned determine how a student is classified as of September 1 for that entire school year, with the exception of Grade 12, who will also be ranked at the end of the first semester. In addition to credits, students must meet minimum expectations (passing standards) for all state assessments (example: Texas Assessment of Knowledge and Skills (TAKS) or State of Texas Assessment of Academic Readiness (STAAR)) for graduation.

Credits required for grade level classification:

- Grade 9 – less than 6 credits
- Grade 10 – minimum of 6 credits and entering at least second year in an accredited high school
- Grade 11 – minimum of 12 credits and entering at least third year in an accredited high school
- Grade 12 - minimum of 19 credits and entering at least fourth year in an accredited high school, OR has completed the early graduation application process

The required class load for each student is seven courses. A senior, with nineteen credits and administrative and parental approval, **may** be excused first or seventh period.

Credit Recovery

Credit Recovery Learning Lab

Gregory-Portland High School utilizes a Credit Recovery Learning Lab as a credit recovery program. The goals of the program are to:

- increase the number of students who graduate on time with their age peers,
- increase the number of students earning credits in required curriculum areas,
- increase the number of students graduating from high school and
- keep students on track for a four year graduation

To achieve these goals, the high school has adopted a program model that creates an alternative to repeating a traditional class, utilizes instructional technology, and encourages staff and student interaction. A lab manager coordinates with counselors to identify and enroll students who qualify for the Credit Recovery Learning Lab. Using criteria established by a high school committee, the counselors adjust the student's schedule to allow time to attend the lab.

Non-Traditional Setting

GPISD offers an option for a non-traditional learning center so that all students will have an opportunity to earn a high school diploma and prepare for post-high school life. Please see a high school counselor or administrator to determine if the alternative learning center is an option for you.

Valedictorian and Salutatorian Qualifications

To be eligible for valedictorian and salutatorian, the following criteria shall be met:

1. The student must have completed four years of high school.
2. The student must have been enrolled at Gregory-Portland High School for the four semesters preceding graduation and must be eligible to graduate at the end of the spring semester.
3. A minimum of ten advanced courses must be taken and credit earned during the four years of high school.
4. Valedictorian and salutatorian must be a candidate for the Distinguished Achievement Program.

The student meeting criteria (1-4) and achieving the highest GPA will be named *valedictorian*.

The student meeting criteria (1-4) and achieving the second highest GPA will be named *salutatorian*.

Gifted and Talented

Gregory-Portland Independent School District's Gifted/Talented Education Program provides an array of learning opportunities that are commensurate with the abilities of gifted and talented (GT) students, emphasizing accelerated and enriched content in language arts, math, science, and social studies. Identified GT students are provided a learning environment that allows for independent study, group work with peers of comparative ability, and group work with peers who represent a heterogeneous population.

At Gregory-Portland High School, GT students receive instruction through Pre-AP, AP, and Dual Credit classes in the four core academic areas. Differentiation is outlined by the classroom teacher through classroom instruction, assignments, grouping, material, and/or grading techniques.

Students may be nominated for the GT program by teachers, parents, counselors, librarians, administrators, or community members. Nomination may also be made by peers or students may self-nominate. Nominations for the GT program take place in March of each school year. For more information, please contact your campus guidance counselor.

Earning College Credit While In High School

Advanced Placement Program

The Advanced Placement (AP) Program is a cooperative educational endeavor between secondary schools, colleges, and universities. For students who are willing and able to apply themselves to college-level studies, the AP Program enriches their secondary and post-secondary school experiences. It also provides the means for colleges to grant credit, placement, or both to students who have applied themselves successfully.

Students should elect to participate in AP courses on the basis of their preparation for such a course, their

willingness and ability to meet its academic challenges, and the time he/she is willing to devote.

After the completion of the AP courses, students are given the opportunity to take the AP exam in May. All students taking AP courses are expected to take the AP exam for the course. The fee for this exam is \$89.00 and is the responsibility of the student. For payment assistance, please see the counselor.

AP teachers have had extensive training in the course design which remains constant throughout the United States. Teachers are not allowed latitude or discrepancy in the high academic standards of the class. Therefore, students must be willing to meet the challenges as presented by these college level courses.

Once enrolled in an AP course, students are required to remain in that course for the entire semester. A parent must attend an informational meeting and sign a course agreement in order for a student to be enrolled in an AP course. The purpose of the informational meeting is to ensure that parents understand the expectations of the AP courses. Meeting times will be communicated at a later date.

Pre-Advanced Placement:

Students can prepare for future college work and Advanced Placement courses by taking Pre-Advanced Placement (Pre-AP) courses in high school. Pre-AP courses shall provide activities to accelerate and expand the regular course. These courses offer students the opportunities to master skills and strategies that will help them in Advanced Placement course participation. Students who participate in Pre-AP sections are expected to practice good study skills, work independently, and appreciate the challenge of an accelerated pace of curriculum, in-depth learning, product development, and above grade level responses. Each course has specific requirements which will include such components as projects, summer reading, homework, and research. Students are required to maintain an acceptable level of performance to remain in Pre-AP and AP courses. Failure to meet these requirements will result in academic probation and possible removal from the class. Please see the GPHS Student-Parent Handbook for additional information.

Note: Students taking Pre-AP courses are not exempt from No Pass/No play requirements.

Dual Credit Program

The dual credit program is designed to provide students an opportunity for greater academic challenge and to reward these students by granting college credit and high school graduation credit concurrently. The dual credit program encourages a wise use of time while offering a considerable savings in money when compared to earning the same credit as a traditional college student while at college away from home. Dual credit courses are college-level academic or technical courses taken by high school students for which they receive high school credit and college credit simultaneously.

Students and parents are responsible for meeting admission procedures set by the Institution of Higher Education providing the particular course or courses. These procedures include:

- Provide qualifying placement scores from college entrance exams,
- Complete both required applications for enrollment, the dual credit enrollment application that must be approved by a counselor and the principal, and the Apply Texas application, and
- Complete all course billing requirements by set deadlines through the institution of higher learning.

Dual Credit college courses may be offered via online, onsite, and/or at participating colleges. This may include instruction being provided by a Del Mar professor or GP High School staff member. There will be a **mandatory parent meeting** each Spring that will provide information as to course availability, deadline information, and mode of delivery

The Institute of Higher Education grants credit when:

1. Course requirements are met, and
2. The student's final transcript is received showing the date of his/her high school graduation.

Note: Letter grades issued by the institution of higher learning will be translated into numerical grades in accordance with 19 TAC 75.191. Numerical grades earned in dual credit will become a part of the student's permanent high school record and will be included on the official academic achievement record (transcript). It is imperative that the institution of higher learning website be checked for drop deadlines. Dropping a dual credit course in high school will count as one of the six allowed college drops.

When planning to attend college, the student must request the transcript from the institute of higher education registrar be sent to the college they are planning to attend. Students are responsible for inquiring about the transferability of courses, scholarship implications, and admission status implications as they apply for future college enrollment.

Job Skill Training

Gregory-Portland ISD works in partnership with area training centers to provide opportunities in several skilled crafts and industry related job training. These areas include construction, welding, electricity, plumbing, and more.

COLLEGE ENTRANCE TESTING

College Entrance Testing

Most colleges and universities require an entrance examination as a part of the college application process. There are two entrance examinations in predominant use at present. These are the Scholastic Aptitude Test (SAT) and the American College Test (ACT).

College entrance testing measures the kind of reasoning skills needed for college by assessing how students apply what they have learned in school. Colleges and universities use these scores as one of the many factors in admissions decisions. The most important factor is high school grades earned in challenging courses. The best preparation is for students to take challenging academic courses and to read and write widely.

It is the student's responsibility to determine which test is required by the college of choice. Registration information is available in the counselor's office. Students are *strongly* encouraged to take college entrance tests before the end of their **junior year**.

Plan ahead! Registration deadlines may be as much as 5 weeks prior to test dates!

SAT

The content of the SAT currently requires:

- **Writing:** Students will be asked to write an essay that requires them to take a position on an issue and use examples to support their position. Questions will be included to see how well students use standard written English.
- **Math:** The math section includes Algebra II topics, such as exponential growth, absolute value, and functional notation, and emphasizes other topics such as linear functions, manipulations with exponents, and properties of tangent lines.
- **Critical Reading:** The critical reading section includes shorter reading passages along with long reading passages. Sentence-completion questions are also included in this section.

2015-2016 SAT® and SAT Subject Test Dates (Anticipated)
October 3, 2015
November 7, 2015
December 5, 2015
January 23, 2016
March 5, 2016
May 7, 2016
June 4, 2016
Standard Fee: \$52.50 / Change Fee: \$28 / Late Fee: \$28

ACT

The content of the ACT currently requires:

- **English:** Measures standard written English and rhetorical skills.
- **Mathematics:** Measures mathematical skills students have typically acquired in courses taken up to the beginning of Grade 12.
- **Reading:** Measures reading comprehension.
- **Science:** Measures the interpretation, analysis, evaluation, reasoning, and problem-solving skills required in the natural sciences.

2015-2016 ACT Test Dates	
September 12, 2015	February 6, 2016
October 24, 2015	April 9, 2016
December 12, 2015	June 11, 2016
Standard Fee: \$38 / Plus Writing: \$54.50 / Change Fee: \$23 / Late Fee: \$24	

PSAT/NMSQT

In order to assist students in making college preparations, the Preliminary Scholastic Aptitude Test / National Merit Scholarship Qualifying Test is taken in October. In the junior year, the PSAT is the qualifying test for the National Merit Scholarship Program.

2015-2016 PSAT/NMSQT Test Dates
October 15, 2015
Standard Fee: \$20

TSI: Texas Success Initiative

The purpose of the new TSI examination is to assess a student's academic ability in order to correctly identify the correct course sequence for students as they enter college. The TSI assessment will determine preparation level for the subjects of reading, math, and writing.

2015-2016 TSI Test Dates (see counselor for dates)
Standard Fee: \$29.00 Del Mar College \$20 GPHS

General Course Descriptions

Dual Credit courses are offered at Gregory-Portland High School in multiple areas. Please see page 9 for more information. An addendum to this course guide will be released that will include all offerings and descriptions.

English Language Arts

In keeping with district-wide curriculum alignment, each grade level focuses on specific language skills. All English courses integrate language, literature, composition, vocabulary, and reading skills. The reading, writing, and speaking experiences in the English classroom help the student develop cultural awareness and personal awareness. Through oral and written communication, research and analysis of information, and problem solving, the student is prepared for the future. At each level, English teachers include preparation to ensure readiness for success on STAAR test as well as college-readiness.

English I

All levels of English I focus on universal themes in short stories, novels, drama and poetry. However, an extensive study of expository texts is also a major focus. Students will also learn fundamental literary devices that will be used in all English classes in high school. In composition they master writing thesis statements, organizing multi-paragraph papers, and writing in response to literature. They emphasize logical arguments with evidence. They are expected to correctly use the conventions and mechanics of written English. The goal for the year is to learn the skills necessary to master the STAAR Exam.

English I Pre-Advanced Placement-1020 (9) Weighted (1 credit)

Prerequisites: Highly recommended to have 8th grade intensive first

Pre-AP students read *above grade level* and have a strong grammar background. They *read extensively outside* the classroom with selections taken from the Pre-Advanced Placement program. They are required to do additional research. They prepare for later Advanced Placement weighted English classes using SAT vocabulary lists. *Assignments include reading to be completed outside of class and summer reading assignments are required.* This course is designed to challenge the student who has a strong interest and ability in the study of English and to prepare students for AP English III and AP English IV.

Recommendation: Intensive course enrollment in grade 8 or a 90+ average in 8th grade English/Reading classes.

English I-1001 (9) (1 credit)

Grammar skills include the functions of phrases and clauses in sentences, pronoun and verb usage, and mechanical skills such as spelling and punctuation. Much emphasis is placed on writing single paragraphs followed by multiple-paragraph essays.

ESL I-1540 (1 credit)

Prerequisite: None

The English I for Speakers of Other Languages (ESL I) Course is for students whose first language is other than English. The native language serves as the foundation for English language acquisition. Cognitive skills transfer from one language to another, and students literate in their first language will apply these skills and other academic proficiencies to the second language. High school students are expected to plan, draft, and complete written compositions on a regular basis. An emphasis is placed on organizing logical arguments with clearly expressed related definitions, theses, and evidence. Students will read extensively in multiple genres from world literature such as reading selected stories, dramas, novels, and poetry originally written in English or translated to English from oriental, classical Greek, European, African, South American, and North American cultures. Students interpret the possible influences of historical context on a literary work.

English II

All levels of English II present the concepts of point of view and the criteria for the structure of various genres in literature; students will achieve a deeper analysis and connection in their reading. Students learn the purpose of significant literary devices and the influence of historical context on literature. In grammar, they are expected to know and correctly use the conventions and mechanics of written English. In composition they focus on research skills and essay writing. The main goal for the year is to learn the skills necessary to master the STAAR Exam.

English II Pre-Advanced Placement-1120 (10) Weighted (1 credit)

Prerequisites: Highly recommended to have Pre-AP English I first

In this course students meet all requirements for tenth grade English; in addition, cultural literacy, SAT vocabulary, and analogy solving are emphasized. Students write a variety of multiple-paragraph essays and creative pieces. They must be capable of independent research; they must also be able to present information in a variety of formats including oral presentations and project development. *Assignments include reading to be completed outside of class and summer reading assignments are required.* This course is designed to challenge the student who has a strong interest and ability in the study of English and to prepare students for AP English III and AP English IV.

Recommendation: Pre-AP enrollment in English I or a 90+ average in English I.

English II-1100 (10) (1 credit)

Prerequisites: English I

Students study world literature and learn the criteria for the structure of various genres. Students will be able to write multiple-paragraph essays in a variety of modes, to propose research questions and draw original conclusions, and to make effective oral presentations. Grammar skills include the functions of verbs and verbals, subject-verb agreement and use of verb modifiers and skills.

ESL II-1550 (1 credit)

Prerequisite: None

The English II for Speakers of Other Languages (ESL II) Course is for students whose first language is other than English. The native language serves as the foundation for English language acquisition. Cognitive skills transfer from one language to another, and students literate in their first language will apply these skills and other academic proficiencies to the second language. High school students are expected to plan, draft, and complete written compositions on a regular basis. An emphasis is placed on persuasive forms of writing such as logical arguments, expressions of opinion, and personal forms of writing. Students will read extensively in multiple genres from world literature such as reading selected stories, dramas, novels, and poetry originally written in English or translated to English from oriental, classical Greek, European, African, South American, and North American cultures. Students interpret the possible influences of historical context on a literary work.

English III

English III Advanced Placement: Language and Composition-1220 (11) Weighted (1 credit)

Prerequisites: Must have at least one of the following: Pre-Advanced Placement English I and/or Pre-Advanced Placement English II

This course is designed for the *advanced student* who reads above grade level and has mastered the composition skills taught in lower grades. In English III AP, students learn and use advanced writing and rhetorical techniques. Students will research literacy topics and write error-free, M.L.A. documented papers. Students write literary essays to Advanced Placement literary prompts. Students learn and use advanced thinking skills. Students write a variety of expository, descriptive, narrative, and persuasive papers based on professional models. Students read classic American literature and philosophy. *Assignments include reading to be completed outside of class and summer reading assignments are required. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.*

All English III classes study American fiction and nonfiction. Students examine the relationships of historical events and politics, and their influence on the literature of the time. Students evaluate expository/informational texts and analyze genre connections. The focus on powerful persuasion and writing for college and career helps the students to achieve success in the future. Students will research and analyze sources, finding those that make a strong argument. They focus on writing analytical and research-based papers. Literary devices are used and analyzed effectively in different genres of literature. Students are expected to know and use the conventions of mechanics of written English.

English III-1200

(1 credit)

Prerequisites: English I, II

Students are expected to plan, draft, and complete written compositions on a regular basis. Students edit their own papers for clarity, engaging language, and correct use of the conventions and mechanics of written English and produce final, error-free drafts. English III students read extensively in multiple genres from American literature and other world literature.

All English III classes study American fiction and nonfiction. Students examine the relationships of historical events and politics, and their influence on the literature of the time. Students evaluate expository/informational texts and analyze genre connections. The focus on powerful persuasion and writing for college and career helps the students to achieve success in the future. Students will research and analyze sources, finding those that make a strong argument. They focus on writing analytical and research-based papers. Literary devices are used and analyzed effectively in different genres of literature. Students are expected to know and use the conventions of mechanics of written English.

English IV

All English IV classes study literature with emphasis on British and Western fiction and non-fiction. Guided by their teachers and texts, students examine the relationships of historical events and politics, to the evolution of idea of systems and literature from fifth century Athens to twenty-first century America. Also, students perfect their thinking skills by studying critical thinking and problem solving paradigms and applying them to recurring human problems as is evident in literature and in personal experiences. Students continue to refine their writing skills as demonstrated by error-free drafts in business, personal, research, and literary modes. They continue to improve their speaking skills as evidenced by oral presentations. The students produce and present videos.

English IV Advanced Placement: Literature and Composition-1310 Weighted

(1 credit)

Prerequisites: Must have been in Advanced Placement English III

This course is recommended for the senior student seeking college credit by examination. It covers all content of English IV and stresses materials for advanced methods of literary analysis required in college literature classes. Successful students will be able to write a lucid essay in a timed writing situation on an unfamiliar piece of literature, and interpret it perceptively. Students will have a repertoire of novels and dramas from world literature as foundation for college course work. Students will perfect their speaking skills. Students will produce and present videos. *Assignments include reading to be completed outside of class and summer reading assignments are required. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.*

English IV-1300

(1 credit)

Prerequisites: Eng I, Eng II, Eng III

This course focuses on literature and composition. Students study a variety of British novels, poetry, or plays. They read and analyze professionally-written reports and essays, and using them as models, they write, edit, and rewrite their compositions to produce error-free drafts. Students study and use advanced vocabulary for SAT and THEA preparation. They improve their writing skills by employing correct grammar, usage, and spelling. They use the decision-making process and learn a variety of persuasive devices to improve their thinking skills. Students will practice and perfect their speaking skills. Student produces and presents videos.

**** In accordance with Section 28.014 of the Texas Education Code, each school district is required to partner with at least one institution of high education to develop and provide college preparatory courses in English language arts. This course will be available free of charge to students. Students may qualify for this course based on performance on coursework, a college entrance exam, or the TSI. Eligible students will be contacted by the counseling office and provided information on the benefits of enrollment.**

Fine Arts

Art

Art I (9-12)-7100

(1 credit)

Prerequisites: None

This class covers various forms of basic Art through perception and expression based on historical and cultural heritage. Students will rely on their environment, familiar sensitivity, memory, spiritual values, imagination, and life experiences as a source for creating artwork. Students will express their thoughts and ideas creatively, while challenging their imagination. They will foster reflective thinking, and develop disciplined efforts, problem-solving, higher order and critical thinking skills.

Students will analyze artistic styles and historical periods and will develop respect for the traditions and contributions of diverse cultures. Students will respond and analyze artworks, thus contributing to the development of lifelong skills of making informed judgments and evaluations.

Students will learn and employ the Elements and Principles of Art and Design. They will learn about Linear Perspective and use the space on a flat surface to give the illusion of three dimensional structures. They will also learn about Color Theory and its uses. Students will demonstrate effectively the use of art media, tools and techniques in Design, Drawing, Painting, Printmaking, and Sculpture.

Students will open their mind and their eyes to the world of Art and will foster a new sensibility for aesthetics and will develop a critical eye for inner and outer beauty through artistic creativity.

Studio Fee: \$15 for purchase of various materials for the creation of an extensive number of art works.

Art II, III, IV (9-12)-

(1 credit)

Prerequisites: Requirement of grade of 85 or better in previous Art class.

Students will hone in artistic skills utilizing all the concepts in Art I but at a higher level. Students will rely on expressive thoughts and ideas. Students will learn to think abstractly and conceptually as a bigger challenge to their imagination in the expression of concepts. They will research the most effective media to create 2 or 3-D Art works with less instruction from instructor. Self-motivation is highly encouraged. At this point higher order and critical thinking skills are essential.

Students will demonstrate knowledge and sophistication of ideas in the preparation for higher education in the Art field. Discipline in Design, Drawing, Painting, Printmaking, and Sculpture is required.

Studio Fee: \$25 for purchase of specialized tools and materials for this class.

Drawing II-7120, Drawing III-7130, Drawing IV-7140 (9-12)

(1 credit each)

Prerequisites: Art I and /or preceding level course

These courses are designed to address a very broad interpretation of drawing issues. For example, many types of painting, printmaking, fibers and studies of sculpture and architectural would qualify as addressing drawing issues based on purposeful decision-making about how to use the elements and principles of art in an integrative way. Students are asked to demonstrate proficiency in two-dimensional design using a variety of art forms. Emphasis is on portfolio proficiency for those students working toward Advanced Placement art credit in two dimensions. (Supplies– maximum \$25.00)

Sculpture II-7320, Sculpture III-7330, Sculpture IV-7340 (9-12)

(1 credit each)

Prerequisites: Art I and /or preceding level course

These courses are intended to address a broad interpretation of sculptural issues in depth and space. These will include mass, volume, form, plane, light and texture. Such element and concepts can be articulated through additive, subtractive and/or fabrication processes. These will include traditional sculpture, architectural models, apparel (jewelry), ceramics, fiber arts, or metalwork. Emphasis is on portfolio proficiency for those students working toward Advanced Placement art credit in three dimension. (Supplies– maximum \$25.00)

Studio Art Advanced Placement-8820 (11-12) Weighted

(1 credit)

Prerequisites: Art Level I, II, III

This class will stress the complexity of this subject. Students should be aware of the high level of expectation. Assignments are college level and students should be able to work all media and techniques in art. **Students must meet with the art teacher at the end of his/her junior year to discuss summer assignments.** Twenty-five pieces of excellent, college-level quality work must be completed by May of the senior year when portfolios are presented to College Board for review. *Preparation of a college portfolio requires a great deal of time and requires outside assignments and summer preparation. This course is designed for serious art students.*

Music

Band I-8300, Band II-8310, Band III-8320, Band IV-8330 (9-12)

(1 credit each)

Prerequisite: Band I-Director Approval; Band II-Director Approval and Band I; Band III-Director Approval and Band II; Band IV-Director Approval and Band III

These courses are offered to the student with previous band experience. It is the performing organization in the school and includes the marching band, the honors band, the symphonic band, and the concert band.

The state allows three semesters of Fall band to count for three semesters of physical education. The Spring semester of band will count as a half credit of Fine Arts.

Instrumental Ensemble: Brass I-8240, Brass II-8250, Brass III-8260, Brass IV-8270 (9-12)

(1 credit each)

Prerequisite: Brass I-Director Approval; Brass II-Director Approval and Brass I; Brass III-Director Approval and Brass II; Brass IV-Director Approval and Brass III

These courses are offered to the student with previous brass experience. Concentration will be on the development of the individual student skills with experiences in small group participation and the development of knowledge of brass literature.

Instrumental Ensemble: Percussion I-8240, Percussion II-8250, Percussion III-8260, Percussion IV-8270 (9-12)

(1 credit each)

Prerequisite: Percussion I-Director Approval; Percussion II-Director Approval and Percussion I; Percussion III-Director Approval and Percussion II; Percussion IV-Director Approval and Percussion III

These courses are offered to the student with previous percussion experience. It concentrates on the development of the individual student skills with experience in small group participation and the development of knowledge of percussion literature.

Instrumental Ensemble: Woodwind I-8240, Woodwind II-8250, Woodwind III-8260, Woodwind IV-8270 (9-12)

(1 credit each)

Prerequisite: Woodwind I-Director Approval; Woodwind II-Director Approval and Woodwind I; Woodwind III-Director Approval and Woodwind II; Woodwind IV-Director Approval and Woodwind III

These courses are offered to the student with previous woodwind experience. Concentration is on the development of the individual student skills with experience in small group participation and the development of knowledge of woodwind literature.

Choral Music I, II, III, IV (9-12) – Female - 8010, 8020, 8030, 8040 / Male – 8015, 8025, 8035, 8045 (1 credit each)

Prerequisite: none

This is a beginning course in vocal development with emphasis on musical understanding and musical literacy through disciplined study and performance. Students are required to attend after-school and evening rehearsals as necessary to prepare for concerts and competitions and to satisfy performance TEKS. Fees include cost for selected uniform(s) for the year, and repair or replacement value of lost or damaged property, and uniform cleaning.

Advanced Choral Music I, II, III, IV (9-12) – FEMALE: 8050, 8060, 8070, 8080 MALE: 8055, 8065, 8075, 8085 (1 credit each)

Prerequisite: Director Approval

This is an intermediate to advanced course in vocal development with emphasis on musical understanding and musical literacy through disciplined study and performance. All students in this ensemble are required to compete in TMEA Choir Auditions and are required to attend after-school and evening rehearsals as necessary to prepare for concerts and competitions and to satisfy performance TEKS. Fees include cost for selected uniform(s) for the year, repair or replacement value of lost or damaged property, and uniform cleaning.

Choral Ensemble I, II, III, IV (10-12) – 7350, 7360, 7370 (1 credit each)

Prerequisite: Director Approval

All students in the Choral Ensemble are also required to be enrolled in Advanced Choral Music. This is an advanced choral ensemble in which the main goal is to develop advanced singing skills through both individual small group performances and competitions. All students in this ensemble are required to compete in TMEA Choir Auditions and UIL Solo & Ensemble competition. All students in this ensemble are required to attend after-school and evening rehearsals as necessary to prepare for concert and competitions and to satisfy performance TEKS. Fees include repair or replacement value of lost or damaged property, uniform cleaning, and cost for selected uniform(s) for the year.

Music Theory I-8600, Music Theory II-8610 (11-12) (1 credit each)

Prerequisite: Director Approval

These courses are preparatory courses for college music majors and minors. The emphasis of the course in music theory will be on the mechanics of music and learning basics of composition and arranging.

Theater

Theater Arts I—8150 (9-12) (1 credit)

Prerequisites: none

This is an introductory **performance** course incorporating basic acting techniques, the role of the actor in interpreting dramatic literature, and the introduction of the theater student to competitive drama events such as UIL one act play, duet and duo acting, dramatic interpretation and humorous interpretation. **All** students in this class will act and learn how to interpret prose and poetry. The students will also be required to participate in the production of a one act play in the intramural one act play contest where they will either act or crew the show also gaining knowledge of technical theater. **Theater Arts I is the prerequisite for all other theater arts and technical theater classes.**

Theater Arts II-8160, Theater Arts III-8170, Theater Arts IV-8180 (10-12) (1 credit each)

Prerequisites: Theater Arts II-Theater Arts I; Theater Arts III-Theater Arts II; Theater Arts IV-Theater Arts III

The primary aim of this advanced theater course is to develop advanced acting skills through performance. **All students** in advanced theater courses are required to compete in TFA, UIL, and NFL tournaments. Other activities of these students include a fall play or musical, Follies Production, and UIL one act play.

Technical Theater I-8100 (9-12)

(1 credit each)

Prerequisites: Theater Arts I

The student enrolled in Technical Theater I is required to attend various types of live production (plays, concerts). After completing required course work, a student may work on school related production as a member of the backstage crew. This course is an introduction to stagecraft and its various elements. Areas of study include sound, lighting, make-up, and costumes, with the primary emphasis on scenic construction.

Technical Theater II-8110, Technical Theater III-8120, Technical Theater IV-8130 (10-12)

(1 credit each)

Prerequisites: Technical Theater II-Technical Theater I and Teacher Approval; Technical Theater III-Technical Theater II and Teacher Approval; Technical Theater IV-Technical Theater III and Teacher Approval

The student enrolled in an Advanced Technical Theater course is required to attend various types of live productions, work on a school related production as a crewmember, complete two major technical theater projects in one of the course areas of study. Areas of study include stage scenic design, stage lighting design, sound design, make-up/costume design and publicity. Students will be expected to crew productions in order to receive credit. Assessment is based on a practical application during class periods and after school work calls. *After school time is required.*

Theater Production I-8490, Theater Production II-8500, Theater Production III-8510 (10-12) (½-1 credit each)

Prerequisites: All Theater Production Courses-Technical Theater I, Cast/Crew Fall Show and/or U.I.L. One-Act Play or Teacher Approval. In addition, Theater Production II-Theatre Production I; Theater Production III-Theater Production II

This class will be offered to students who are in production after school or with teacher approval on production work during the day. In order to develop his/her acting skills and concepts, the student shall be provided opportunities to audition, rehears, and perform in public in either the fall or spring production. To develop their production skills and concepts, technical theater students will be provided opportunities to do research and design, work on technical crews for a production. Assessment is based on a practical application during class periods and after school work calls. *After school work is required.*

Health & Physical Education

Health Education-1st semester-5421, 2nd semester-5422 (9 - 12)

(½ credit)

Prerequisites: None

Health Education is a basic, one semester health course. The student will study the principles of good grooming, physical fitness, nutrition and weight control, mental health and behavior, systems of the body, prevention and control of diseases, drug and alcohol abuse, tobacco use, First Aid and CPR. A unit of Self Responsibility focuses on Parenting and Paternity Awareness.

NOTE: 1 credit Health Science Technology I (See Career and Technical Education) will also fulfill the one-half credit Health Education requirement.

Foundations of Personal Fitness Level I-5100 (9-12)

(½ credit)

Prerequisite: None

This course is designed to motivate students to strive for lifetime personal fitness with an emphasis on the health-related components of physical fitness. Students will acquire the knowledge and skills for movement that provides the foundation for enjoyment, continued social development through physical activity, and access to a physically-active lifestyle. This course is the required prerequisite for all other physical education courses.

Individual Sports-5130 (9-12)

(½ credit)

Prerequisite: Foundations of Personal Fitness

This course is designed to provide a wide range of individual lifetime sports. The objective of this course is to utilize individual sport activities to continue the development of health related fitness. The students will be expected to exhibit a level of competency in several individual sports such as badminton, golf, table tennis, track and field, weight-training, tennis, and aerobics.

Team Sports-5120 (9-12)

(½ credit)

Prerequisite: Foundations of Personal Fitness

This course is designed to provide a wide range of team sports to help develop health-related fitness and an appreciation for team work and fair play. Students will be expected to demonstrate competency using basic offensive and defensive skills of a sport while participating in a game such as basketball, softball, flag football, floor hockey, soccer, baseball, kickball, and volleyball.

Physical Education Equivalent (9-12)

(½-1 credit)

Prerequisites: Completed Application (available in office) signed by Coach/Teacher

These athletic courses are offered with emphasis on conditioning, skill perfection, advanced technique and strategy. Before and/or after school attendance and U.I.L. participation are mandatory. Offerings include: football, boys' and girls' basketball, tennis, cross country, golf, girls' soccer, boys' soccer, swimming, baseball, girls' softball, volleyball, cheerleading, fall semester marching band, and state approved (2 hr) Career and Technical courses.

Sports Medicine I – 5320

(1 credit)

Prerequisites: None

This course focuses on the study and application of first aid/CPR/AED, organization and administrative considerations, prevention of injuries, recognition, evaluation, and immediate care of injuries, rehabilitation and management skills, taping and wrapping techniques, emergency procedures, nutrition, sports psychology, human anatomy, and physiology, therapeutic modalities, and therapeutic exercise.

Sports Medicine II –5325

(1 credit)

Prerequisites: Sports Medicine I, apply to be a G-P Athletic Training Student, approval of licensed Athletic Trainer

This course is designed to be offered as a full year innovative course which includes classroom instruction and clinical application. This course will be a more in depth approach to specific injury evaluation, injury management, special tests, emergency procedures, etc.

Athletic Trainer – 5311, 5312, 5313, 5314

Prerequisites: Sports Medicine I

(1/2 to 1 local credit)

This course is designed to give students hands-on experience in the treatment and rehabilitation of athletic injuries. Fundamentals of kinesiology and biomechanics are taught. The course requires participation outside of the school days, working practices and contests. There are long hours and hard work involved, but the rewards are tremendous. Students must have a strong commitment and permission from the athletic trainer or athletic director to be enrolled in the class.

This credit can be a P.E. equivalent. See your counselor for details.

Cheerleading 1st semester-5531, 2nd semester-5532 (9th grade). 1st semester-5533, 2nd semester-5534 (10th grade). 5530 (11th & 12th grade).

Prerequisites: Qualifying for cheerleading squad

This course is required for students qualifying for the cheerleading squad. Students must remain eligible to participate.

NOTE: The state allows four credits of physical education or equivalent to be counted toward state graduation requirements. Any additional credit earned in physical education is local credit. The state allows two semesters of Fall band, Fall Cheerleading, and JROTC to substitute as one (1) semester for physical education. The District shall not award state graduation credit for physical education for private or commercially sponsored physical activity programs conducted either on or off campus.

Journalism

Journalism I-1660 (9-11) (½-1 credit)

Prerequisites: None

This is an introductory course to newspaper and yearbook production. Students will receive basic instruction on news writing, feature writing, editorial writing, and headline writing. Students will also learn basic desktop publishing and photography skills.

Journalism/Photojournalism-1600 (9-12) (½ credit)

Prerequisite: None

Photojournalism stresses the use of images to tell a story. Units of study will include basic photography, digital photo preparation, caption writing and publication layout and design. Students will produce a variety of photo and layout projects.

Advanced Journalism: Yearbook Production I-1640 (10-12) (½-1 credit)

Prerequisites: Journalism I, Photojournalism, or senior status with advisor approval

This course is for the production of the student memory book. Applicants must demonstrate a flair for creativity, an interest in student affairs, and the ability to work cooperatively with others. Extra time is required outside of class. Application required. Limited enrollment.

Advanced Journalism: Newspaper Production I-1610 (10-12) (½-1 credit)

Prerequisites: Journalism I, Photojournalism or senior status with advisor approval

This course is for the production of the student newspaper. Applicants must demonstrate an interest in writing, news reporting, photography, and student affairs. Students must also have the ability to work cooperatively with others. This course requires time in addition to regular class time. Application required. Limited enrollment.

Advanced Journalism: Newspaper Production II-1620, Newspaper Production III-1630 (11-12) (½-1 credit each)

Prerequisites: Completion of Journalism I/Advanced Newspaper I, or senior status with advisor approval

Students in these courses must be willing to accept the challenges of higher level thinking skills; leadership roles such as editor responsibilities and independent research; extensive writing; advanced graphics and design; and desktop publishing. Extensive time is required outside of class. Application required. Limited enrollment.

Advanced Journalism: Yearbook Production II-1650, Yearbook Production III-1670 (11, 12) (½-1 credit each)

Prerequisites: Completion of Journalism I/Advanced Yearbook Production I, or senior status with advisor approval

Students in these courses must be willing to accept the challenges or higher level thinking skills; leadership roles such as editor responsibilities and more independent research; extensive writing; advanced graphics and design; desktop publishing; and advanced photography techniques. Extensive time is required outside of class. Limited enrollment.

Independent Study/Journalism-1690 (11-12) (½-1 credit)

Prerequisites: Teacher Approval and Advanced Journalism II or III

This course offers the student the opportunity to conduct research, produce original work in print or other medium, and extensively develop an advanced skill in a specific area of interest.

Languages Other Than English

German

German I-6410 (9-12)

(1 credit)

Prerequisites: None

This is an academically demanding course for beginners. The students will learn the foundations of oral and written communication (listening, speaking, reading, writing), including essential aspects of grammar. They will acquire basic communication skills through an emphasis on oral proficiency and become familiar with the country's culture and geography as well as other German-speaking countries.

German II-6420 (10-12)

(1 credit)

Prerequisites: German Level I

This is an academically demanding course in which students review and practice the concepts acquired in the first year. They will learn additional grammar concepts, increase their vocabulary and improve their communication skills through continued emphasis on oral proficiency. They will be introduced to the history and the literature, and gain an appreciation for the culture.

German II Pre-Advanced Placement-6430 (10-12) Weighted

(1 credit)

Prerequisites: German Level I

This is an academically challenging college preparatory course in which students review, practice, and apply the concepts acquired in the first year. They will incorporate additional grammar and vocabulary concepts and improve their communication skills. They will also be introduced to the history and literature of the country and begin composing essays in the language. Cultural appreciation activities will be included. This course is designed to challenge the student who has a strong interest and ability in the study of German.

German III-6440 (11-12)

(1 credit)

Prerequisites: German Levels I & II

This course extends language applications acquired in the second year. Students will review extensively and practice grammar, vocabulary, and communication skills. Emphasis is placed on role-playing and speaking in everyday situations. Students will also continue writing and reading literature in the language.

German III Pre-Advanced Placement-6450 (11-12)

(1 credit)

Prerequisites: German Levels I & II Pre-AP

This course continues to develop language skills (reading, writing, listening, speaking) that can be used in various activities and disciplines. It will stress understanding the written and spoken language and responding in correct and idiomatic German. Extensive training in the organization and writing of compositions will be emphasized. Students will also read and discuss simple selections of original literature. This course is designed to challenge the student who has a strong interest and ability in the study of German.

German IV Advanced Placement-6460 (12) Weighted

(1 credit)

Prerequisites: German Level I, II & III (Recommended German II Pre AP and German III Pre AP)

This course is designed for students who wish to specialize in the language or in a related field. They will develop grammar and vocabulary through extensive practice in written communication. Students will read selections from novels and poetry in the original language and use them as a basis for oral and written literary critique. Students will utilize Internet resources to become familiar with contemporary culture and language in German-speaking countries. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Spanish

Spanish I-6110 (9-12)

(1 credit)

Prerequisites: None

In this course students will:

- Learn the foundation for Spanish pronunciation and standard grammar.
- Engage in oral, aural, and written exchanges of learned materials
- Acquire basic vocabulary such as likes, dislikes, chores, sports, etc.
- Read short inserts from newspapers, magazines, etc.
- Learn the present tense of regular and irregular verbs
- Give commands to peers as well as to adults
- Compare the Spanish language and Hispanic culture to student's own language and culture

Students are expected to use as much Spanish in class as possible (a minimum of 40% is expected in Spanish I). Department recommends an 85% average or better for students who are planning on enrolling in Pre-AP Spanish classes.

Spanish II-6120 (9-12)

(1 credit)

Prerequisites: Spanish Level I

In this course students will review and build on Spanish I concepts, and will continue to:

- Develop oral, aural, writing, reading skills
- Build up vocabulary repertoire
- Review present tense
- Learn how to communicate in the past and future tenses
- Review regular commands and add irregular commands
- Compare the Spanish language and Hispanic culture to student's own language and culture

Students are expected to use as much Spanish in class as possible (a minimum of 55% is expected in Spanish II). Department recommends an 85% average or better for students who are planning on enrolling in Pre-AP Spanish classes.

Spanish II Pre-Advanced Placement-6150 (9-12) Weighted

(1 credit)

Prerequisites: Spanish Level I

This is an **academically challenging college preparatory course**. In this course students will review and build on Spanish I concepts, and will continue to:

- Develop oral, aural, writing, reading skills
- Build up vocabulary repertoire
- Review present tense
- Learn how to communicate in the past and future tenses
- Introduce the subjunctive
- Read selected prose works from Peninsular and American authors
- Compare the Spanish language and Hispanic culture to student's own language and culture

Students are expected to use as much Spanish in class as possible (a minimum of 85% is expected in Spanish II Pre-AP). Department recommends an 85% average or better for students who are planning on enrolling in Pre-AP Spanish classes.

Spanish III-6130 (10-12)

(1 credit)

Prerequisites: Spanish Levels I & II, or to have performed satisfactorily on a Spanish Proficiency Test (*see Spanish Department Chair or counselor*)

This course extends language applications acquired in the second year. Students will review extensively and practice grammar, vocabulary, and communication skills. Emphasis is placed on role-playing and speaking in everyday situations using standard Spanish language. Student will expand his/her knowledge of

writing and reading selected passages of literature in the target language.

Spanish III Pre-Advanced Placement-6140 (10-12) Weighted (1 credit)

Prerequisites: Spanish Levels I & II or to have performed satisfactorily on a Spanish Proficiency Test (*see Spanish Department Chair or counselor*)

This is an academically challenging college preparatory course in which students review, practice, and apply the concepts acquired in the first year. They will incorporate additional grammar and vocabulary concepts and improve their communication skills through continued application of more advanced techniques. They will also be introduced to the Spanish history and literature and begin composing essays in the target language. The second semester of this course will be conducted in Spanish 80% of the time. This course is designed to challenge the student who has a strong interest and ability in the study of Spanish.

Spanish IV Advanced Placement Language-6170 (12) Weighted (1 credit)

Prerequisites: Spanish Levels I, II & III. Recommended Spanish III Pre-Advanced Placement.(*see Spanish Department Chair or counselor*)

This course is a college level course which will be conducted 90% of the time in Spanish. Students will continue to develop language skills (reading, writing, listening, speaking) that can be used in various activities and disciplines to further enhance the acquisition of Spanish. It will stress understanding the written and spoken language and responding in standard Spanish. Extensive training in the organization and writing of compositions will be emphasized. Students will also read and discuss selections of literature in the target language. Upon completion of this course, students are expected to take an Advanced Placement Exam and may receive up to 12 semester hours of college credit if his/her score meets college requirements.

Spanish Literature V Advanced Placement Literature-6180 (12) Weighted (1 credit)

Prerequisites: Spanish Level I, II & III

This course is a detailed study of various themes in Spanish literature from around the world. Students will practice, develop, and apply their language study from the previous course in reading, discussing, and writing about novels, drama, and poetry in the original language. Opportunities for extensive training in oral and written communication are available for students wishing to specialize in the language. Upon completion of this course, students are expected to take an Advanced Placement Exam and may receive up to 12 semester hours of college credit if his/her score meets college requirements.

Local Credit Electives

Clerical Practice-9999 (12)—Local Credit Only (½-1 local credit)

Prerequisites: Administrative Approval, passing all courses in previous semester, completion of all state testing requirements and 21 credits

This course is designed to provide the student with opportunities to learn concepts and skills related to successful employment, including; organizational skills, clerical skills, effective communication skills, and productive work habits and attitudes. Students may be assigned to the attendance office, or counselors' office. Students must prove capable of maintaining confidentiality of information records. Students will be expected to meet course objectives in order to earn a numerical grade which will not be used in Grade Point Average computation. There are a limited number of clerical practice positions approved each year.

Nurse's Aide-9999—Local Credit Only (½-1 local credit)

The Nurse's Aide course is offered to junior and senior level students who have an interest in a career in the health field. Aides are responsible for keeping all first aid supplies containers clean and full. They will assist the nurse with temperature readings, making ice packs, filing of student records and emergency cards, making copies and other medical office duties as requested by the nurse. This course is available only to responsible students with satisfactory grades and passing scores on state assessments. Students will

be expected to meet course objectives in order to earn a numerical grade which will not be used in Grade Point Average computation. *Nurse approval required on registration form.*

WLC Alternative Education Electives

These courses are offered through the alternative education center, and are delivered via online instruction only.

20th Century American History—(11-12) (1/2 credit)

Students will examine the country's economic, political, governmental, cultural, and technological growing pains during the 1900s. This course allows students to broaden their knowledge of history and geography for a better understanding of today's world. This course explores America's century of dynamic change. This elective offers lessons that examine the change, conflict, and growth during the previous 100 ranging from the Industrial Age, Imperialism, and the Roaring '20s, to the Great Depression, two world wars and the Holocaust, this course takes a look at the country's not-so-distant past. Students in the course are given the tools to connect to the lessons of the nation's history, gaining insights into how history, gaining insights into how history affects the opportunities of future generations. They will also analyze the way that technology and innovation transform society and culture.

The Civil War—(11-12) (1/2 credit)

This course examines the strife of a nation ripped in two by ideology. From the secession of South Carolina to the Confederacy's surrender to Appomattox, the pivotal events of the Civil War come to life with compelling stories that recreate the major battles and examine key figures. This elective examines the causes of secession, the cultural differences of the North and South, pivotal battles, a soldier's life, the Emancipation Proclamation, the surrender at Appomattox, the lasting effects of the war on the Union. Lessons include a discussion of key figures including Abraham Lincoln, Robert E. Lee, Ulysses S. Grant, Jefferson Davis, and William T. Sherman. This class also encourages discussion of freedom and human rights.

The Vietnam Era—(11-12) (1/2 credit)

From the initial involvement of the United States in Vietnam to the Paris cease-fire agreement signed in 1973, this elective chronicles three turbulent decades of conflict that began in Southeast Asia but affected the entire world. This elective examines French colonization, the Cold War, military strategy, and America's anti-war movement. This course broadens student understanding of the factors that led to the conflict, Vietnam's role in the Cold War, the military strategy of the U.S., the anti-war movement, the fall of Saigon, and even the music inspired by this controversial period. With an in-depth look at how prominent historical figures such as Dien Bien Phu, Lyndon B. Johnson, Dwight D. Eisenhower, JFK and Richard Nixon played a part in history, this course offers both a political and a global perspective of the three turbulent decades that left a permanent mark on the youth of America and brought images of the war-time events on the other side of the world to our television screens.

Music Theory—(11-12) (1 credit)

With emphasis on theory, this course lays the foundation of a lifetime of appreciation of music and allows students to discover the basics of rhythm, timing, melody, and full composition. This two semester course answers the question, "Why study music?" with really answers. From rhythm and meter to making harmony and working with chords, this course lays the foundation for a lifetime love of learning. Fully interactive, it goes beyond the basics with audio and video elements that help to explain vague concepts and offer illustration.

Mathematics

Algebra I-2640 (9) (1 credit)

Prerequisites: None

The course goals are to develop preciseness of language and skills in algebraic manipulations, to develop reasoning, and to show uses and applications of algebra in problem solving, and to prepare students for the end of course exam.

Algebra I Pre-Advanced Placement-2650 (9) Weighted (1 credit)

Prerequisites: None

This course is designed for the very outstanding mathematics student. Course content will be presented at an accelerated rate with greater emphasis on solving word problems. This course is designed to challenge the student who has a strong interest and ability in the study of mathematics. Students will need a strong foundation in prior mathematics instruction. A minimum average of 85 in Pre-Algebra is recommended for students enrolling in this course.

Algebra II-2660 (9-12) (½-1 credit)

Prerequisite: Algebra I, Geometry

This course emphasizes a thorough understanding of the structure of algebra and development of competent skill levels in an algebraic operation. Main areas of study include the complex number system, coordinate geometry, relations and functions, and problem solving. This course prepares students for success in advanced math courses.

Algebra II Pre-Advanced Placement-2670 (9-12) Weighted (½-1 credit)

Prerequisites: Algebra I Pre-AP or Algebra I, and Geometry

Students will need a strong foundation in prior mathematics instruction. A minimum average of 75 in Algebra I Pre-AP, a minimum average of 85 in Algebra I, or a previous teacher recommendation are recommended for students enrolling in this course.

This course is designed for the very outstanding mathematics student. Materials will be presented at an accelerated rate with more emphasis on word problems. This course is designed to challenge the student who has a strong interest and ability in the study of mathematics.

Note: Algebra II & Geometry may be taken concurrently if student earned at least a 90 average in Algebra I.

Geometry-2680 (9-11) (1 credit)

Prerequisite: Algebra I

This course will enable students to develop a logical pattern of thinking with the use of geometric figures such as triangles, parallelograms, circles, prisms, cones and spheres. A good understanding of arithmetic and algebra are essential to the mastery of the concepts presented. This course prepares students for the end of course exam.

Geometry Pre-Advanced Placement-2690 (9-11) Weighted (1 credit)

Prerequisites: Algebra I Pre-AP or Algebra I

Students will need a strong foundation in prior mathematics instruction. A minimum average of 75 in Algebra I Pre-AP, a minimum average of 85 in Algebra I, or a previous teacher recommendation are recommended for students enrolling in this course.

This course is designed for the very outstanding mathematics student. Subject matter will be presented at an accelerated rate with more emphasis on problem solving and solid geometry. This course is designed to challenge the student who has a strong interest and ability in the study of mathematics.

Mathematical Models with Application-2720 (10-12) (½-1 credit)

This course may be taken concurrently with Geometry, but may not be taken during or after Alg II to meet graduation requirements.

In this course students use algebraic, graphical, and geometric reasoning to recognize patterns and structure, to model information, and to solve problems from various disciplines. Students use mathematical methods to model and solve real-life applied problems involving money, data, chance, patterns, music, design, and science. Students use mathematical models from algebra, geometry, probability and statistics, and connections among these to solve problems from a wide variety of advanced applications in both mathematical and nonmathematical situations.

Advanced Quantitative Reasoning (AQR)-3040 (10-12)

(½-1 credit)

Prerequisite: Geometry and Algebra II

AQR (Advanced Quantitative Reasoning) is a math course that follows Algebra II and fulfills the state requirement for a fourth year of math. It can be taken as an alternative to precalculus or as an elective to accompany or follow precalculus. It builds on, reinforces, and extends what students have learned in their prior math courses and covers a range of interesting topics—understanding credit, debt, and investments, statistics in the media, and managing data utilizing technology.

- AQR prepares you for a variety of future paths, either in college or the workplace.
- AQR gives you tools to deal with numerical information you see every day.
- AQR helps you maintain the math skills you have learned before to prepare you for placement tests or aptitude tests for college or the workplace.
- AQR meets the math requirement of the 4 by 4 recommended graduation plan.
- AQR lets you build on and use what you have learned to solve relevant problems.

Precalculus-2700 (10-12)

(½-1 credit)

Prerequisites: Geometry and Algebra II

This course places an emphasis on the function concept, exploring and developing mathematical skills in the topics of trigonometry, advanced algebra, and analytic geometry. Students study a variety of mathematical concepts and analyze the relationships between them as well as further develop their problem-solving skills. This course is required for students who need to take calculus. This course is recommended for college bound students or students who will be pursuing a technical field or technical coursework.

Precalculus Pre-Advanced Placement-2710 (10-12) Weighted

(½-1 credit)

Prerequisites: Geometry and Algebra II

Students will need a strong foundation in prior mathematics instruction. A minimum average of 75 in Algebra II Pre-AP or a minimum average of 85 in Algebra II are recommended for students enrolling in this course.

This course develops the central ideas, concepts, formulas, and problem solving techniques essential to understanding and progress in calculus. Emphasis is on the function concept as well as many important concepts in trigonometry, advanced algebra, and analytic geometry. This course is designed to challenge the student who has a strong interest and ability in the study of mathematics. This course is recommended for college bound students.

Calculus AB Advanced Placement-2750 (11-12) Weighted

(½ - 1 credit)

Prerequisites: Precalculus Pre-Advanced Placement or Precalculus

Students will need a strong foundation in prior mathematics instruction. A minimum average of 75 in Precalculus Pre-AP, a minimum average of 85 in Precalculus, or a previous teacher recommendation are recommended for students enrolling in this course.

The major topics for Calculus AB are differential and integral calculus, including such topics as limits and continuity, derivatives of elementary functions, velocity and acceleration in linear motion, techniques of integration, area between curves, volumes of solids of known cross-section, and the fundamental theorem of calculus. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester. This course is recommended for college bound students.

Calculus BC Advanced Placement-2780 (12) Weighted

(½-2 credits)

Prerequisite: Successful completion of Advanced Placement Calculus AB **OR** Precalculus Pre-AP with a recommended minimum average of 95.

Calculus BC includes all Calculus AB topics PLUS L'Hopital's Rule, integration by parts, and Calculus involving parametric, polar, and vector functions; more applications of derivatives, more applications of integrals; more techniques of anti-differentiation; polynomial approximations and series. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester. This course is recommended for college bound students.

Independent Study in Mathematics I-3000, Independent Study in Mathematics II-3010

(10-12) Weighted

(½-1 credit each)

Prerequisite: **Independent Study in Mathematics I**-Geometry, Algebra II; and math teacher recommendation. Application/interview required prior to enrollment.

Independent Study in Mathematics in Mathematics II – Independent Study in Mathematics I and teacher approval I

This course is designed to prepare students for mathematics competitions, including UIL Number Sense, Calculator Applications, and Mathematics. Students are required to learn to use HP RPN calculators. Emphasis is placed on number theory and problem solving. Extensive practice time outside of the classroom is required, as is attendance at UIL competitions on Saturdays throughout the year. Students who compete successfully may qualify for scholarships from TMSCA and/or UIL. Students must complete an application and receive approval of the Independent Studies teacher before being allowed to enroll in the class..

Statistics Advanced Placement-2770 (11-12) Weighted

(½ - 1 credit)

Prerequisites: Algebra II, or Algebra II Pre-AP is required, PreCalculus is recommended

This course will introduce students to statistical concepts and tools for collecting, analyzing, and drawing conclusions from data. Students will explore data making use of graphical and numerical techniques to study patterns and departures from patterns. Using probability as a tool, students will anticipate and model data distribution to obtain statistical inferences and conclusions from data. Students may concurrently enroll in Precalculus or Precalculus Pre-AP and Statistics Advanced Placement. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester. This course is recommended for college bound students.

**** In accordance with Section 28.014 of the Texas Education Code, each school district is required to partner with at least one institution of high education to develop and provide college preparatory courses in mathematics. This course will be available free of charge to students. Students may qualify for this course based on performance on coursework, a college entrance exam, or the TSI. Eligible students will be contacted by the counseling office and provided information on the benefits of enrollment.**

Science

Biology -3140 (9-11)

(1 credit)

Prerequisites: None

This is a course designed for students with an average understanding of biology. Students enrolled in this course will study cell structure and function, mechanisms of genetics, biological evolution and classification, biological processes and systems, and interdependence within environmental systems.

Biology Pre-Advanced Placement-3150 (9-11) Weighted

(1 credit)

Prerequisites: none

Students will need a strong foundation in prior science instruction. A minimum average of 80 in eighth grade science and passing the Science STAAR are recommended for students enrolling in this course.

First Semester: Cellular biology provides in-depth investigations of the structure and functions of cells, the replication of cells, and the concept of inheritance.

Second Semester: Plant and animal survey is designed to show the progressive complexity of organisms. Emphasis is on dissections of invertebrates and vertebrates.

This course is designed to challenge the student who has a strong interest and ability in the study of science.

Biology Advanced Placement-3170 (11-12) Weighted (1 credit)

Prerequisites: Biology or Pre AP Biology AND Chemistry or Pre-AP Chemistry

This course is designed to be the equivalent of the general biology course and the laboratory course usually taken during the 1st college year. For some, this course enables freshman students to undertake 2nd year work in the biology sequence at their college or to register in courses in other fields when general biology is a requirement. For other students, the AP Biology course fulfills the lab science requirement and frees time for other courses. Topics included in AP Biology include: molecules, cells, enzymes, heredity, molecular genetics, evolutionary biology, diversity of organisms, comparative plant and animal studies and ecology. Students will develop an understanding of biological concepts rather than memorizing terms and technical details. Science is a process not an accumulation of facts. Lab investigations will encourage problem solving and higher-order thinking skills. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Chemistry-3200 (10-12) (1 credit)

Prerequisites: Biology Pre-AP or Biology AND Alg I or Alg I Pre-AP AND completion or concurrent enrollment in a second unit of mathematics

This is a lab course that emphasizes a variety of topics that include: characteristics of matter, energy transformations during physical and chemical changes, atomic structure, periodic table of elements; behavior of gases, bonding; nuclear fusion and nuclear fission; oxidation-reduction; chemical equations; solutes; properties of solutions; acids and bases; and chemical reactions.

Conceptual Chemistry—3190 (11-12) (1 credit)

This is a lab course that offers students the concepts-before-computation approach to chemistry. Moreover, the course of instruction provides comprehensive content and a three-step learning cycle—Exploration, Concept Development, and Application—that builds conceptual understanding and offers computational reinforcement. It gives students the opportunity to gain an understanding of the properties of matter, atomic structure, chemical bonding reactions, inorganic compounds, solutions, acids and bases, and gas laws and nuclear chemistry. Hands on methods are emphasized in this course and it is designed for students who are on the conceptual path in science.

Chemistry Pre-Advanced Placement-3210 (10-12) Weighted (1 credit)

Prerequisites: Biology Pre-AP or Biology AND Alg I or Pre-AP Alg I

Students will need a strong foundation in prior science and math instruction. A minimum average of 85 in Alg I or Alg I Pre-AP is recommended for students enrolling in this course.

This course is designed to prepare students for the AP Chemistry course which is equivalent to college chemistry. Rigorous problem solving will be stressed; therefore students are required to have a strong background in Algebra. Topics to be covered include: characteristics of matter; atomic structure ; periodic table of elements; chemical bonding; mole concepts; chemical equation and reactions, stoichiometry; behavior of gases; properties of solutions; acids and bases; thermochemistry; and nuclear chemistry.

This course is designed to challenge the student who has a strong interest and ability in the study of science.

Chemistry Advanced Placement-3230 (11-12) Weighted

(1 credit)

Prerequisites: Chemistry or Chemistry Pre-AP Algebra II or Algebra II Pre-AP (may be taken concurrently)

AP Chemistry is designed to be the equivalent of the general chemistry course and the laboratory course usually taken during the 1st college year. Students in this course should attain a depth of understanding of chemistry fundamentals and a reasonable competence in dealing with chemical problems. The course contributes to the development of the student's abilities to think clearly and express ideas, orally and in writing, with clarity and logic. For some, this course enables freshman students to undertake 2nd year work in the chemistry sequence at their college or to register in courses in other fields when general chemistry is a requirement. For other students, the AP Chemistry course fulfills the laboratory science requirement and frees time for other courses. For those students planning to major in a medical field, it provides the basis for the chemistry/biology courses they will need. For engineering majors, it is the basis for many courses related to the study of materials, thermodynamics, electricity, quantum mechanics, etc. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Integrated Physics & Chemistry-3120 (10)

(1 credit)

Prerequisites: Biology

NOTE: According to TEA, students on the Recommended High School Program must take a biology, chemistry, and a physics course. They may earn a fourth science credit in IPC, but if they take this course, the class must be successfully completed prior to taking chemistry and physics classes.

This is an introductory course preparing students for chemistry or physics courses. Subjects covered include chemistry and physics, which deal primarily with the properties of matter, chemical reactions, solution chemistry, forces and motion, effects of waves, and energy transformations.

Physics -3300 (10-12)

(1 credit)

Prerequisites: Biology or Biology Pre-AP and IPC or Biology or Biology Pre-AP and Chemistry or Chemistry Pre-AP and Algebra I or Algebra I Pre-AP AND completion or concurrent enrollment in Geometry or Geometry Pre-AP

This course offers students the opportunity to gain an understanding of mechanics, fluids, thermodynamics, electricity, and energy. Hands on methods are emphasized in this curriculum.

Conceptual Physics--3320 (10)

(1 credit)

Prerequisites: Biology

This course offers students the concepts-before-computation approach to physics. Moreover, the course of instruction provides comprehensive content and a three-step learning cycle—Exploration, Concept Development and Application—that builds conceptual understanding and offers computational reinforcement. It gives students the opportunity to gain an understanding of mechanics, fluids, thermodynamics, electricity, and energy. Hands on methods are emphasized in this course and it is designed for students who are on the conceptual path in science.

Physics Pre-Advanced Placement-3310 (11-12) Weighted

(1 credit)

Prerequisites: Chemistry and Precalculus

Students will need a strong foundation in prior science and math instruction. A minimum average of 90 in Alg II or Alg II Pre-AP is recommended for students enrolling in this course.

This course may be taken concurrently with Precalculus.

This course will emphasize the use of mathematics and problem solving skills in observing physical phenomena. The first semester will be devoted to the study of matter especially motion and force, the second semester will concentrate on the study of energy including sound, light, and electricity energy. The curriculum emphasizes the use of hands on methods in the development of physical principles. This course is designed to challenge the student who has a strong interest and ability in the study of science.

Physics C Advanced Placement-3330 (12) Weighted

(1 credit)

Prerequisites: Precalculus or Precalculus Pre-AP and Physics or Physics Pre-AP

This course will provide a systematic introduction to the main principles of physics and will emphasize the development of problem solving- ability. It is assumed that the student is familiar with algebra and trigonometry and some theoretical developments may use basic concepts of calculus. For students with intent to major in life sciences, pre-medicine, and some applied sciences, AP Physics will serve as a one-year terminal course and upon successful completion of the exam, will fulfill the physics requirement and will free time for courses. For students intending to major in the physical sciences or engineering, AP Physics will serve as foundation for more advanced physics course work. This is an excellent opportunity for those students majoring in medicine to take the AP exam to place out of college course; however, those students who plan to major in engineering will be advised to take engineering physics in college rather than placing out with the AP exam. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Earth and Space Science (ESS) – 3260 (11-12)

(1 credit)

Prerequisites: Biology and Chemistry or Physics (May be taken concurrently)

Earth and Space Science (ESS) is a capstone course designed to build on a student's prior scientific knowledge and skills to understand the Earth's system in space and time. Students study a variety of topics that include: theories of the origin of the universe and the solar system, models of formation of Earth's atmosphere, hydrosphere, and geosphere, scientific dating methods of fossils and rock sequences, the composition of the Earth's interior, plate tectonics theory, and energy distribution in the Earth's subsystems. Students will appreciate the interaction of the components of the Earth's system in terms of both natural and human-influenced processes.

Anatomy and Physiology of Human Systems-3360 (11-12)

(1 credit)

Prerequisites: Biology and Chemistry or Physics (May be taken concurrently)

Anatomy and physiology is a class designed to give students an in-depth introduction to the anatomy and physiology of the human body. This class will provide students with an overall understanding of the structures, organs, and systems that make up the human body. Lab experiments will include fresh and preserved specimens. Students will take a comparative approach using various organs, and yes, even dissect cats. In investigations, students will be required to observe, record, interpret, and analyze scientific data in an organized problem solving method.

Aquatic Science - 3250 (11-12)

(1 credit)

Prerequisites: Biology and Chemistry or Physics (May be taken concurrently)

Aquatic Science is a laboratory-based and field-based course that investigates the biodiversity of salt water and fresh water organisms, including their interactions with the physical and chemical environment. The special characteristics of aquatic resources will also be examined. This class encourages students to join in an exploration of the global and local aquatic world. Through field trips, classroom academic work, and field and laboratory research, and period periodic field trips, students will gain an understanding and appreciation of our oceans, lakes and rivers, and the creatures that inhabit them. The students will also assess the importance of legislation and policy making on the regulation of water.

Environmental Science Advanced Placement-3290 (11-12) Weighted

(1 credit)

Prerequisites: 3 credits from: Biology and Chemistry or Physics. (Strongly recommended: At least one previous course should have been a Pre-AP Science)

This course provides students with the scientific principals, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems and to examine alternative solutions for resolving and/or preventing them. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Environmental Systems-3340 (11-12) (1 credit)

Prerequisites: Biology and Chemistry or Physics (May be taken concurrently)

This course is intended to investigate the environment through hands-on activities. The topics include: Interaction of biotic and abiotic earth systems; principles of ecology and natural systems; sources and flow of energy; and ecosystem structure, function and management.

Laboratory Management-3270 (12) (1 local credit)

Prerequisites: Three (3) Science Credits and Science Department approval.

This course provides advanced level and enrichment experiences in laboratory safety, investigative lab techniques and investigative design. Students must be able to communicate laboratory and safety directives and laboratory procedures in both oral and written form.

Social Studies

World Geography Studies-4100 (9) (1 credit)

Prerequisites: None

This course provides students the opportunity to study the interaction of people and cultures with their physical environments in the major areas of the world. Content of the course may include location of major land forms and features; effect and influence of climate, weather, and oceans on people and their environment; natural resources, population, and problems of urban growth.

World Geography Pre-Advanced Placement-4120 (9) Weighted (1 credit)

Prerequisites: None

In this course Pre-AP students will meet all requirements for World Geography. In addition, this course will stress research, independent study and writing. Students will be required to analyze case studies, current world situations and various geographical themes. Students will also be required to present information in a variety of formats. This course is designed to challenge the student who has a strong interest and ability in the study of social studies.

World History Studies-4110 (10) (1 credit)

Prerequisites: None

The first semester in this course is devoted to an extensive study of ancient civilizations including the rise of River Valley civilizations, the classical eras of the Eastern and Western world, the Middle Ages in Europe, the Islamic World and Africa, Asia in the Post-Classical Era and Beyond and the Renaissance and Reformation. The second semester will include an in depth and thorough study of the Americas Pre-Columbian Empires, the Old Regime: including Absolutism and Enlightenment, the Age of Democratic Revolution and the Industrial Revolution. This will lead into an extensive study of World War I and the Russian Revolution, the Great Depression, World War II, De-Colonization and the Cold War. The conclusion of the course will end with a look into challenges facing our world today

World History Pre-Advanced Placement-4130 (10) Weighted (1 credit)

Prerequisites: None

In this course Pre-AP World History students shall be exposed to the areas of study as those found in World History. This is an enriched course stressing research, independent study and thought. Successful students will develop a variety of skills necessary to arrive at conclusions based on relevant information and to present justification and evidence to clearly persuade in a variety of formats. This course is designed to challenge the student who has a strong interest and ability in the study of social studies.

United States History Studies Since Reconstruction-4210 (11) (1 credit)

Prerequisites: None

This course is a continuation of United States eighth grade history. The content covers significant political, economical, and social developments after the Civil War to the present time.

United States History Advanced Placement-4220 (11) Weighted (1 credit)

Prerequisites: None

This U.S. History Advanced Placement course is designed to meet the needs of the junior or senior student seeking to meet college U.S. History course requirements through passing the Advanced Placement Examination. This is an enriched course stressing independent study and research. It covers U.S. History from discovery to modern development. Successful students will develop the skills necessary to arrive at conclusions on the basis of an informed judgment and to present reasons and evidence clearly and persuasively in essay format. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

United States Government-1st semester-4371, 2nd semester-4372 (12) (½ credit)

Prerequisites: World Geography, World History, & U. S. History

This course includes the study of the U. S. Constitution, national, state, and local structure as well as the political processes at each level. Emphasis is also placed on Texas law and the rights and responsibilities of citizenship. In this course, students will learn the following concepts in-depth:

- Branches of National government and the responsibilities of each
- Comparative government systems
- Governmental processes

Government Advanced Placement-1st semester-4373, 2nd semester-4374 (12) Weighted (½ credit)

Prerequisites: World Geography, World History, U.S. History

This course is designed for the senior student seeking college credit through the AP exam. Emphasis is on development of critical thinking skills through the identification and study of various aspects of the United States Government and political system. Successful students will develop the necessary skills to arrive at conclusions on the basis of informed judgment and to present justification and evidence clearly and persuasively in various forms, especially essays, oral reports, and journals. *Extensive outside reading, writing, and research assignments are required.* Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Economics-1st semester-4391, 2nd semester-4392 (12) (½ credit)

Prerequisites: World Geography, World History, U.S. History

Over the course of a semester, Economics with Emphasis on the Free Enterprise System and Its Benefits is the culmination of the economic content and concepts studied from Kindergarten through required secondary courses. The focus is on the basic principles concerning production, consumption, and distribution of goods and services (the problem of scarcity in the United States and the comparison with those in other countries around the world). Students will investigate the concepts of specialization and international trade, economic growth, key economic measurements, and monetary and fiscal policy. Students will study the roles of the Federal Reserve System and other Financial institutions, government and Business in a free enterprise (capitalist, free market) system.

Economics Advanced Placement-1st semester-4393, 2nd semester-4394 (Macro) (12) (½ credit)

Prerequisites: World Geography, World History & U. S. History Studies

This course is designed for the senior student seeking college credit. This course is designed to aid in the understanding of economic concepts such as scarcity, opportunity costs, supply and demand, economic indicators and national economic accounting measures. Students will be expected to graph economic situations and analyze fiscal and monetary policies. This course is designed to aid students in preparation for the AP Macroeconomics exam. *Extensive outside reading, writing, and research assignments are*

required. Students are expected to take the AP exam in May and are required to remain in this course for the entire semester.

Psychology-4341 (11-12)

(½ credit)

Prerequisites: None

In Psychology, an elective singly semester course, students study the science of behavior and mental processes. Students examine the full scope of the science of psychology, such as the historical framework, methodologies, human development, motivation, emotion, sensation, perception, personality development, cognition, learning, intelligence, biological foundations, mental health, and social psychology.

Sociology-4352 (11-12)

(½ credit)

Prerequisites: None

Sociology, an elective single semester course, is an introductory study in social behavior and organization of human society. This course will describe the development of the field as a social science by identifying methods and strategies of research leading to an understanding of how the individual relates to society and the ever changing world. Students will also learn the importance and role of culture, social structure, socialization, and social change in today's society.

Anthropology-4231 (12)

(½ credit)

Prerequisites: None

An introduction to the four disciplines within general anthropology: physical anthropology including population genetics and evolution; linguistics focused on origin and evolution of language; archeology as it helps define the evolution of society; and cultural anthropology in which preliterate cultures and contemporary cultures are compared.

Cultural Anthropology-4232 (12)

(½ credit)

Prerequisites: None

A course encompassing the comparative study of human groups, their language, kinship, art, religion, economic, and political behavior from their earliest appearance to the present.

Current Topics and Issues in Social Studies-TBD (11-12) Weighted

(½ credit)

Prerequisites: None

This course will be a development of an in-depth understanding the forces (historical, cultural, political, and physical) that have shaped today's current events. It will investigate the impact of these events on today's countries (those involved directly, indirectly, or not at all). Students will determine best solutions to these issues that will create a stable future, and make predictions about where current issues will arise in coming years. Students will compare and contrast world opinions on current issue. This course is intended for students with a strong interest in Social Studies. This will be a rigorous course with complex topics discussed, and extensive requirements for reading, writing, and discussion.

Advanced Topics in Social Studies-TBD (11-12) Weighted

(½ credit)

Prerequisites: None

In this course, students will explore topics such as: The Bible as history, the expansion of the Nuclear Club, the place of revolution in the modern world, the American Presidency in modern times, and in-depth studies of conspiracy issues. Students will participate in dialogues on these issues and do original research. Projects, debates, and position papers will be the standard assessment. This course is intended for students with a strong interest in Social Studies. This will be a rigorous course with complex topics discussed, and extensive requirements for reading, writing, and discussion.

Humanities

Independent Studies Humanities--1180 (10-12 weighted)

(½ to 1 credit)

Prerequisites: Admission to the Humanities is limited to students who apply and are accepted. See Mr. Schuetz for application. Humanities students are expected to prepare and participate in contests: TFA, UIL, NFC.

This course is designed for the student who would like to work on a daily basis to hone their skills in the academic UIL contests and in the competitive debate and speech events. Each student is expected to participate in competitive tournaments in debate, speech, and the UIL academic events. Research projects and the competitive Mock Trial contest may be prepped as well. Students will be given the opportunity to compete in the Forensic Association and The National Forensic League circuits and can earn entry to the national speech tournament.

Special Education Courses

Applied English I, Applied English II, Applied English III, Applied English IV-See Counselors for Course Numbers

These language arts courses provide individualized instruction for students who have particular needs in the area of Reading and Writing. The courses focus on grade appropriate language arts studies in language/writing, literature/reading, and speaking/listening. Students will practice the application of both oral and written use of language as well as interpret and respond to relevant reading materials.

Applied Algebra I, Applied Geometry, Applied Algebra II, Applied Math IV- See Counselors for Course Numbers

These courses provide individualized instruction for students who have particular needs in the area of basic math skills. The courses reinforce a variety of practical, real life situations that facilitate the understanding of A curriculum designed to strengthen basic math skills is utilized along with appropriate grade level instruction of Algebra and Geometry.

Life Skills-Counselor will provide course number.

The Life Skills course is developed to integrate the domestic, recreation, leisure and community domains. Students investigate through activity-based sessions, a variety of activities associated with daily living experiences. Organizing a daily routine and schedule will serve the students in their process of taking charge of independent living. Students will study areas of: cooking, safety, leisure (including art and music), chores, duties, responsibilities, budget, time management, first aid and communication. Personal safety and responsibility will be examined in response for taking care of one's self, others and/or pets. Health care, transportation, telephone skills and appropriate recreation activities are addressed in the context of developing a full capacity living experience. Students will develop strategies to respond to potential emergencies that may appear in the process of daily living. Students will also explore the interactive relationship between the student and the community. Instruction in this area will focus on transportation, directionality, local landmarks, and accessing local establishment for goods, services and emergency assistance.

Students will experience job training within the community and the school environment by volunteering in various positions on campus, providing clerical services to staff and doing service projects for the school. Students will participate in field trips to local establishments that may include, but are not limited to the community library, various merchants, restaurants, movie theater, and bowling alley where they will develop skills to access services and leisure activities independently.

Vocational Experience-Counselor will provide course number.

The vocational experience program is developed in order to assist students in making a smooth transition from academic pursuits to employment. Students will examine the relationship between what is learned in the classroom and how these skills are applied on the job. Investigations are made in the areas of: job skills and interests; the application and interview process; understanding the job experience; quality employability skills; job performance evaluations; job training; employment policies; procedures, rights

and responsibilities; positive, productive work experiences; work ethic and job attitudes; co-worker, supervisor and customer relationships; safety; decision making; fiscal responsibility; corrective feedback or criticism; and teammanship and collaboration. Learning to apply personal skills through successful employment will be reinforced. Self-initiative, follow through, and best efforts are skills applied in the process of a positive work experience.

Speech

Communication Applications-Fall semester-8421 or Spring semester-8422 (9-12) (½ credit)

Prerequisite: None

Designed to teach the basic speaking skills needed both in the classroom and in later professional and social life, the development of self confidence and poise in everyday speaking situations is the primary aim of this course. Students are urged to take this course during their 9th or 10th grade year in order to fully utilize acquired skills throughout their high school careers.

Communication Applications Plus/Public Speaking-Fall semester-8423, Spring semester-8424 (9-12) (½-1 credit)

Prerequisite: None

This is a special course for students who want to obtain the required credit and compete in debate and speech events. In addition to regular communication applications, the student will learn cross examination debate, Lincoln-Douglas Debate, Public Forum, Extemporaneous Speaking, Student Congress, and Mock Trial. Students will be required to attend tournaments and can earn membership in the National Forensic League (an honor organization for competition students).

Public Speaking I-8710, Public Speaking II-8750, Public Speaking III-8760 (9-12) (½-1 credit)

Prerequisites: Public Speaking I – None. Public Speaking II, III - Previous level

The ability to communicate effectively is key to success in life. Communication though speaking involves many facets. The student will learn how to present himself/herself physically to make an impression. The physical aspect also involves dressing for success. The student will learn how to research for a variety of topics and speech formats and how to apply the information to a specific speech. The student will learn to use and apply logic. Most importantly, the student will be coached and given multiple opportunities to fine tune their skills at competitive tournaments. The student will be performing in Persuasive, Extemporaneous Speaking, Informative Extemporaneous Speaking, Domestic Extemporaneous Speaking, International Extemporaneous Speaking, Original Oration, Student Congress, as well as other formats as they occur. In addition to the educational benefits, the student will be able to advance to state and national tournaments which will open scholarship opportunities.

Note: Public Speaking alone does not meet Speech requirements for graduation.

Oral Interpretation I-8740, Oral Interpretation II-8750, Oral Interpretation III-8760 (9-12) (½-1 credit)

Prerequisites: Oral Interpretation I – None. Oral Interpretation II, III - Previous level

In this course students will study the oral reading or performance of literary text as a communication art. The student will have the opportunity to perform prose, poetry, and readers' theater material in competition. The course is designed to prepare students for U.I.L. prose and poetry interpretation contests.

Debate I, II, and III – TBD (9-12) (1 credit)

Prerequisite: None

Debate offers the student an opportunity to learn and practice skills that they will be able to utilize for the rest of their lives. In debate, the student will research multiple topics and use this research to create cases on both sides of the resolution. The student will learn to use and apply logic. Most importantly, the student will be coached and will be given many chances to practice their skill set by debating at tournaments. In addition to the educational benefits, the student will be able to advance to state and national tournaments that will garner them honors and open scholarship opportunities. Each student will learn Cross-Examination Debate, Lincoln-Douglas Debate, Public Forum Debate, and Congressional Debate.

Independent Study in Speech-8460 (12)

(½-1 credit)

Prerequisites: Debate II or III with a minimum grade of 80. Reading on Level. Teacher Approval

These courses are designed for students who want to use higher order thinking skills and develop oral presentation skills. The course will cover the content of the debate curriculum, but will exceed the regular course in depth of analysis, individual development of speaking skills, research skills, and thinking skills. Students should attend all tournaments the squad enters. Students who do not attend tournaments should expect to be removed at an appropriate time.

Leadership

Peer Assistance and Leadership (PAL)-4340 (11-12)

(1 credit)

Prerequisite: Application Process/teacher recommendations

The PAL course is a peer helping program in which students will be trained in a variety of helping skills which enables them to assist other students in having a more positive and productive school experience. Course applicants should have a strong interest in helping others. (See PALS instructor for application.)

Gregory-Portland

The Career and Technical Education (CTE) department provides quality programs for students at GPISD. The department offers course sequences in Agriculture, Food, and Natural Resources; Arts, A/V Technology and Communications; Business Management and Administration; Health Science; Hospitality and Tourism; Human Services; Information Technology; Law, Public Safety Corrections and Security; Transportation, Distribution, and Logistics.

The programs offered follow the **AchieveTexas College and Career Initiative** - an education initiative designed to prepare students for a lifetime of success. It allows students to achieve excellence by preparing them for secondary and postsecondary opportunities, career preparation and advancement, meaningful work, and active citizenship.

AchieveTexas is designed to help students (and their parents) make wise education choices. It is based on the belief that the curricula of the 21st century should combine *rigorous* academics with *relevant* career education. When schools integrate academic and technical education, students can see the "usefulness" of what they are learning. The system also facilitates a seamless transition from secondary to postsecondary opportunities.

Clusters, Programs of Study, Careers, and Coherent Course Sequence:

(Detailed course descriptions to follow)

Agriculture, Food & Natural Resources			
Animal Systems	Veterinarian, Veterinary Assistant, Veterinary Assistant, Zoo Keeper		
Course		Grade	Credit
Principles of Agriculture, Food and Natural Resources		9-12	.5
Equine Science		10-12	.5
Small Animal Management		10-12	.5
Wildlife, Fisheries, and Ecology Management		9-12	1
Anatomy and Physiology of Human Systems (Science Credit)		11-12	1
Advanced Animal Science		12	1

Agriculture, Food & Natural Resources			
Power, Structural and Technical Systems	Welder and Cutter, Agricultural Engineer, Welder-Fitter, Machine Operator, Inspector, Testers, Samplers		
Course		Grade	Credit
Principles of Agriculture, Food and Natural Resources		9-12	.5
Agricultural Mechanics and Metal Technologies		10-12	1
Welding I Dual Credit Del Mar (Intro to Shielded Metal Arc Welding/Intro to Pipe Welding)		11-12	2
Welding II Dual Credit Del Mar (Intermediate and Advanced Shielded Metal Arc Welding)		11-12	2

Agriculture, Food & Natural Resources			
Plant Systems	Floral designer, Horticulturist, Greenhouse supervisor, Landscape Developer		
Course		Grade	Credit
Principles of Agriculture, Food and Natural Resources		9-12	.5
Landscape Design and Turf Grass Management		10-12	.5
Horticulture Science		10-12	.5
Advanced Plant and Soil Science		12	1

Arts, A/V Technology and Communications			
A/V Technology, Film, Journalism, Broadcasting, Printing Technology	Videographer, Film Editor, Producer, TV Announcer, Graphic Designer, Desktop Publisher, Artist, Multimedia Artist, Animator		
Course	Grade	Credit	
Principles of Arts, A/V Technology and Communications	9-10	.5	
Digital and Interactive Media	9-10	.5	
Business Information Management I	9-12	1	
Audio/Video Production	9-12	1	
Computer Programming (PreAP)	10-12	1	
Animation	10-12	1	
Digital Video and Audio Design (2nd year students) *	10-12	1	
Audio/Visual Production Lab	10-12	1	
Advanced Audio/Visual Production (3 rd year students)*	11-12	1	
Advanced Audio/Visual Production (4 th year students)*	12	1	
Practicum in Audio Video Production	12	2	

Business Management and Administration			
Financial Management and Accounting	Accountant, Financial Officer, Bookkeeper, Billing Clerk		
Course	Grade	Credit	
Principles of Business, Marketing and Finance	9-11	.5	
Dollars and Sense	9-12	.5	
Money Matters	9-12	.5	
Business Information Management I	9-12	1	
Accounting I	10-12	1	
Business Information Management II	11-12	1	
Accounting II	11-12	1	
Computer Programming I (PreAP)	10-12	1	
Practicum in Business Management	12	2	

Health Science Technology			
Therapeutic Services	Nurse, Physical Therapist, Physician, EMT		
Course	Grade	Credit	
Medical Terminology / Medical Law and Ethics	11	.5	
Electrocardiography / Health Unit Coordinator	11	.5	
Phlebotomy and Clinical	12	1	
Nurse Aide for Health Care and Clinical	12	1	
Practicum for Emergency Medical Technician	DelMar	2	

Hospitality and Tourism			
Restaurants and Food/Beverage Services	Chef, Cook, Baker		
Course	Grade	Credit	
Principles of Human Services	9-12	.5	
Dollars and Sense	9-12	.5	
Lifetime Nutrition and Wellness	10-12	1	
Restaurant Management	DelMar	1	
Culinary Arts	DelMar	2	
Hospitality Services	DelMar	1	

Human Services			
Early Childhood Development or Family and Community Services	Preschool Teacher, Child Care Worker, Teacher Assistant, Nutritionist, Dietitian and Social Service Worker		
Course	Grade	Credit	
Principles of Human Services	9-12	.5	
Dollars and Sense	10-12	.5	
Child Development	10-12	1	
Lifetime Nutrition and Wellness	10-12	1	

Human Services			
Personal Care Services	Cosmetologist, Hairdresser, Manicurist		
Course	Grade	Credit	
Principles of Human Services	9-12	.5	
Dollars and Sense	10-12	.5	
Cosmetology I	DelMar	2	
Cosmetology II	DelMar	2	

Information Technology			
Web and Digital Media, Programming and Software Development	Web Developer, Multimedia Artist and Animator, Graphics Designer, Computer Programmer		
Course	Grade	Credit	
Principles of Information Technology	9-12	.5	
Digital and Interactive Media	9-12	.5	
Business Information Management I	9-12	1	
Web Technologies	10-12	1	
Animation	10-12	1	
Web Design *	10-12	1	
Computer Programming I (PreAP)	10-12	1	
AP Computer Science *	11-12	1	
Independent Study Computer Science *	12	1	

Law, Public Safety, Corrections, and Security			
Law Enforcement Services	Police Officer, Sheriff, Highway patrol Officer		
Course	Grade	Credit	
Principles of Law, Public Safety, Corrections and Security	DelMar	1	
Court Systems and Practices	DelMar	1	
Law Enforcement I	DelMar	1	
Law Enforcement II	DelMar	1	

Law, Public Safety, Corrections, and Security			
Fire Science	Firefighter		
Course	Grade	Credit	
Principles of Law, Public Safety, Corrections and Security	DelMar	1	
Firefighter I	DelMar	2	
Firefighter II	DelMar	2	

Manufacturing			
Manufacturing Production Process Development	Petrochemical, refinery, and manufacturing process operators		
Course	Grade	Credit	
Process Technology I – Dual Credit Del Mar	11-12	2	
Process Technology II – Dual Credit Del Mar	11-12	2	

Science, Technology, Engineering and Mathematics			
Electronics	Electrician		
Course	Grade	Credit	
Electronics	DelMar	2	
Advanced Electronics	DelMar	2	

Transportation, Distribution and Logistics			
Facility and Mobile Equipment Maintenance	Automotive Service Technician		
Course	Grade	Credit	
Automotive Technology	DelMar	2	
Advanced Automotive Technology	DelMar	2	

Agriculture, Food and Natural Resources

Principles of Agriculture Food and Natural Resources - 9141 (9-12) (½ credit)

Prerequisite: None

This course is must for students without an agriculture background, as it allows student to develop Knowledge and skills related to agriculture gaining knowledge about animals, soils, plants and leadership skills used in business.

Small Animal Management - 9115 (9-12) (½ credit)

Prerequisite: None

If you are looking to work with animals this is a good course to take. You will be learning about animal systems as well as small animals such as , but not limited to, small mammals, amphibians, reptiles, avian, dogs, and cats.

Equine Science - 9242 (10-12) (½ credit)

Prerequisite: None

If you want to learn about horses, donkeys, and mules this is the course for you. However you will be learning more than this. Students will acquire knowledge as it relates to animal systems, and develop knowledge and skills regarding career opportunities, entry requirements, and industry expectations.

Wildlife, Fisheries, and Ecology Management - 9118 (9-12) (1 credit)

Prerequisite: None

If you would like to work out doors and help wildlife and ecology this course would help meet those goals. This course examines the management of game and non-game wildlife species, fish, and aqua crops and their ecological needs as related to current agricultural practices. To be prepared for careers in natural resource systems, student need to attain academic skills and knowledge, acquire technical knowledge and skills related to natural resources, and develop knowledge and skills regarding career opportunities, entry requirements and industry expectations.

Advanced Animal Science - 9116 (12) (1 credit)

Prerequisite: Minimum of one course in Ag cluster

Students who want to learn the scientific and technological aspect of animal science through laboratory experiences should select this course. These investigations will involve actively obtaining and analyzing data with physical equipment, but may also involve experimentation in a simulated environment as well as field observations that extend beyond the classroom.

Landscape Design and Turf Grass Management - (10-12) (½ credit)

Prerequisite: None

This course would be useful in managing industry and home lawns a well as golf courses. You will need to develop an understanding of landscape and turf grasses management techniques and practices if this is the direction you are considering.

Horticulture Science - 9232 (10-12) (½ credit)

Prerequisite: None

If you like learning about plants and working with your hands seeing fast results, this course should be considered. This course is designed to develop an understanding of common horticultural management practices as they relate to food and ornamental plant production.

Agricultural Mechanics and Metal Technologies - 9171 (10-12) (1 credit)

Prerequisite: Principles of Agriculture, Food, and Natural Resources

This class, over a period of a lifetime, could save you thousands I mean THOUSANDS OF \$ THAT IS

DOLLARS. Meaning this should be looked at very closely. Working with hands, fast results, pride in workmen ship, and much money saved. What are you waiting for? This course is designed to develop an understanding of agricultural mechanics as it relates to safety and skills in tool operations, electrical wiring, plumbing, carpentry, fencing concrete and metal working techniques.

Advanced Plant and Soil Science - (12) (1 credit)

Prerequisite: One credit from Agriculture, Food, and Natural Resources cluster

Learn about the natural world, how plant and soil science has influenced a vast body of knowledge with applications still to be discovered. Prepare for careers in the food and fiber industry.

Welding I – 9260 (11-12) (2 credit)

This course includes the Introduction to Shielded Metal Arc Welding process and Introduction to Pipe Welding. Intro to Shielded Metal Arc: emphasis placed on power sources, electrode selection, oxy-fuel cutting and various joint designs. Intro to Pipe Welding: students will use the shielded metal arc welding process (SMAW), including electrode selection, equipment setup, and safe shop practices. Emphasis on weld positions 1G and 2G using various electrodes. This is a dual credit course, and students must meet minimum acceptance requirements.

Welding II – 9270 (11-12) (2 credit)

Prerequisite: Welding I

This course includes Intermediate Shielded Metal Arc Welding and Advanced Shielded Metal Arc Welding. It will include a study of the production of various fillets and groove welds. Preparation specimens for testing in all positions. Advanced topics will be based on welding codes. Training provided with various electrodes in shielded metal arc welding processes with open V-groove joints in all positions. This is a dual credit course, and students must meet minimum acceptance requirements.

Arts, Audio/Video Technology, and Communications

Principles of Arts, Audio/Video Technology, and Communications - 8530 (9) (½ credit)

Prerequisite: None

In this one-semester course, students will be introduced to the various and multifaceted career opportunities in the Arts, Audio/Video Technology, and Communications cluster and the knowledge, skills, and educational requirements for those opportunities. G-P's video program is a professionally-oriented Career Training set of instruction. The students who follow this course plan have been recognized on a national level. Video production is not only instructional and analytical, but also artistic.

Animation - 8535 (10-12) (1 credit)

Prerequisite: Principles of Arts, Audio/Video Technology, and Communications

Learn Adobe Flash to add animation, video, and interactivity to web pages. Utilize the techniques used in the animation industry including animating still images and text, and importing video. Work with the Toon Boom software widely used in the industry to produce cartoon animation.

Audio/Video Production - 8580 (9-12) (1 credit)

Prerequisite: Principles of Arts, Audio/Video Technology, and Communications

Almost every student has a video phone in their pocket. With that tool, a whole world of career opportunities is becoming available. Video production is probably the most universally known of all visual media and is an integral component of many technology applications. To further develop the technical knowledge and skills needed for success in the Arts, Audio/Video Technology, and Communications career cluster, students will be expected to develop an understanding of the industry with a focus on pre-production, production, and post-production audio and video activities, as delivered by an industry professional with 15 years TV experience.

Digital Video & Audio Design / Audio/Visual Production Lab - 8550 (10-12) –

(2nd year students with instructor approval)

(1 credit)

Prerequisite: Audio/Video Production

This class is responsible for producing GPTV, the school's morning announcements. Students will learn video basics as well as participate in pre-production, production, and post production stages of video creation, distribution, and evaluation of the product. Students enrolled in this course will be computer literate and have experience with the basic electronic productivity tools. These students will also develop an appreciation for deadlines.

Advanced Audio/Visual Production and Lab– 8560 (11-12)

(1 credit)

Prerequisite: Digital Video & Audio Design (3rd year students with instructor approval)

Independent Studies in Video Tech is for 3rd year video students who have completed both Audio/Video Production (first year students) and Video Tech (second year students/GPTV). These students will primarily work as producers for video projects brought to the class by outside clients. They will be responsible for either performing or delegating all necessary work--preproduction, camera, audio, & editing. They will also be responsible for completing all of that work in a timely manner. Past projects have included Choir DVD's, theater documentaries, English class Shakespeare productions, and work for outside clients such as the San Patricio County Library System, Shattered dreams, and Christus Spohn Hospital.

Practicum in Audio Video Production–(12)

(2 credit)

Prerequisite: Digital Video & Audio Design with instructor approval

Careers in audio and video technology and film production span all aspects of the audio/video communications industry. Within this context, in addition to developing advanced technical knowledge and skills needed for success in the Arts, Audio/Video Technology and Communications career cluster, students will be expected to develop an increasing understanding of the industry with a focus on applying pre-production, production, and post-production audio and video activities in a studio environment. This course may be implemented in an advanced audio, video, or animation format. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities

Business Management and Administration

Principles of Business, Marketing, and Finance - 7031 (9-11)

(½ credit)

Prerequisite: None

Do you want to major in Business in college? Which area? This introductory course will allow the student to explore various branches of the business world. Learn about marketing goods and services, advertising, and how global business impacts world economy. Analyze the sales process and explore financial management.

Business Information Management I - 7020 (9-12)

(1 credit)

Recommended Prerequisite: Touch System Data Entry and Principles of Business, Marketing, and Finance

Managing Information - learn how to produce quality documents used in the business world to communicate, make projections and track progress. A must for all careers and post-secondary assignments. The class will focus on Microsoft Office applications. You will develop skills using Word, Access, Excel, Desktop Publishing and PowerPoint to enhance your business production experience.

Business Information Management II - 7030 (9-12)

(1 credit)

Prerequisite: Business Information Management I

Learn the bells and whistles of Microsoft Office to support your performance in the workplace, society and postsecondary education. Produce sophisticated documents and presentations using this multimedia software package (Microsoft Office). Utilize this class to develop the skills necessary to meet business certification standards. Global certification such as IC³ and MOS are beneficial when applying for business

related positions.

Dollars and Sense - 7033 (10-12) (½ credit)

Recommended Prerequisite: Principles of Human Services

The Dollars and Sense course focuses on consumer practices and responsibilities, the money management process, decision-making skills, impact of technology, and preparation for human services careers. Students are encouraged to participate in career and technical student organizations and other leadership organizations

Money Matters - 7034 (9-12) (½ credit)

Recommended Prerequisite: Principles of Business, Marketing and Finance

This course focuses on global issues and how it impacts your money. Students will analyze financial options based on current and projected economic factors. Students will also learn about how to invest in stocks and bonds and how they can use this for retirement. Students will gain knowledge and skills necessary to set long-term financial goals.

Accounting I - 9770 (10-12) (1 credit)

Prerequisite: None

This is the introductory course for students interested in the field of accounting, "the language of business". It is the vehicle for reporting financial information about a business entity to many different groups of people. Learn the skills to record, classify, summarize, analyze and communicate accounting information both manually and with the use of accounting software. Utilize these skills in management decision making.

Accounting II - 9760 (11-12) (1 credit)

Prerequisite: Accounting I

Extend your knowledge of basic accounting and managerial decision making. Produce and analyze financial reports. Capture all of the details necessary to satisfy the needs of a business — managerial, financial reporting, projection, analysis, and tax reporting.

Computer Programming PreAP - 7040 (10-12) Weighted (1 credit)

Prerequisite: Principles of Information Technology or Principles of Business, Marketing, and Finance

Want to learn how to write programs for the computer? What is computer programming? Basically your job will be to instruct the computer to do things. It consists of creating simple steps using the programming languages of C++ and JAVA to get the computer to perform specific tasks. These tasks will manipulate different types of objects such as numbers, words, and simple graphics. Use this introductory programming class as a foundation for many computer, mathematics and engineering related fields at the postsecondary level. It will enhance logical problem solving skills while creating programs to perform business, math, and science related tasks.

Practicum in Business Management - 9819 (12) (2 credit)

Recommended Prerequisite: Business Information Management I and II

The Practicum is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experiences occur in a paid or unpaid arrangement and a variety of locations appropriate to the nature and level of experience. Students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and to make a successful transition to the workforce or postsecondary education. Students apply technical skills to address business applications of emerging technologies. Students develop a foundation in the economical, financial, technological, international, social, and ethical aspects of business to become competent consumers.

Health Science Technology

Medical Terminology and Medical Law and Ethics - TBD (11-12) (½ credit)

Study of word origin and structure through the introduction of prefixes, suffixes, root words, plurals, abbreviations and symbols, surgical procedures, medical specialties, and diagnostic procedures.

Principles, procedures, and regulations governing the legal and ethical relationships among physicians, patients, and health care professionals. Includes ethical issues related to the various healthcare professions and patient confidentiality.

Electrocardiography and Health Unit Coordinator - TBD (11-12) (½ credit)

Includes basic electrocardiography procedures, interpretation of basic dysrhythmias, and appropriate treatment modalities. Fundamentals of cardiovascular anatomy and physiology are covered.

Phlebotomy and Clinical - TBD (11-12) (1 credit)

Skill development in the performance of a variety of blood collection methods using proper techniques and standard precautions. Includes vacuum collection devices, syringes, capillary skin puncture, butterfly needles and blood culture and specimen collection on adults, children, and infants. Emphasis on infection prevention, patient identification, specimen labeling, quality assurance, specimen handling, processing, accessioning, professionalism, ethics, and medical terminology. The clinical portion of this course will include a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision provided by the clinical professional.

Nurse Aide for Health Care and Clinical - TBD (11-12) (1 credit)

Preparation for entry level nursing assistants to achieve a level of knowledge, skills, and abilities essential to provide basic care to residents of long-term care facilities. Topics include resident's rights, communication, safety, observation, reporting and assisting residents in maintaining basic comfort and safety. Emphasis on effective interaction with members of the health care team. The clinical portion of this course will be a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional.

Hospitality and Tourism

See the Del Mar College, CTE / Dual Credit Section of the Course Description Guide

Human Services

Principles of Human Services - 9203 (9-12) (½ credit)

Prerequisite: None

This laboratory course will enable students to investigate careers in the human services career cluster, including counseling and mental health, early childhood development, family and community, and personal care services. Each student is expected to complete the knowledge and skills essential for success in high-skill, high-wage, or high-demand human services careers.

Dollars and Sense - 7033 (10-12) (½ credit)

Recommended Prerequisite: Principles of Human Services

The Dollars and Sense course focuses on consumer practices and responsibilities, the money management process, decision-making skills, impact of technology, and preparation for human services careers. Students are encouraged to participate in career and technical student organizations and other leadership organizations.

Interior Design - 9151 (10-12) (1 credit)

Recommended Prerequisite: Principles of Human Services

This course is a technical course that addresses psychological, physiological, and sociological needs of individuals by enhancing the environments in which they live and work. Individuals use knowledge and skills related to interior and exterior environments, construction, and furnishings to make wise consumer decision, increase productivity, and compete in industry.

Interpersonal Studies - 9204 (10-12) (½ credit)

Recommended Prerequisite: Principles of Human Services

This course examines how the relationships between individuals and among family members significantly affect the quality of life. Students use knowledge and skills in family studies and human development to enhance personal development, foster quality relationships, promote wellness of family members, manage multiple adult roles, and pursue careers related to counseling and mental health services.

Lifetime Nutrition and Wellness - 9201 (10-12) (1 credit)

Recommended Prerequisite: Principles of Human Services

Preparing food for a healthy way of living is a growing trend in our society. Utilize the skills learned in this class as you prepare foods in a lab setting. This course allows students to use principles of lifetime wellness and nutrition to help them make informed choices that promote wellness as well as pursue careers related to hospitality and tourism, education and training, human services, and health sciences.

Child Development - 9122 (10-12) (1 credit)

Recommended Prerequisite: Principles of Human Services

This technical laboratory course addresses knowledge and skills related to child growth and development from prenatal through school-age children, equipping students with child development skills. Students use these skills to promote the well-being and healthy development of children and investigate careers related to the care and education of children.

Cosmetology I – 9020 (2 credits)

Cosmetology II – 9050 (2 credits)

See the Del Mar College, CTE / Dual Credit Section of the Course Description Guide

Information Technology

Principles of Information Technology - 7036 (9-10) (½ credit)

Prerequisite: None

This course provides student with a wide variety of information technology skills. Career exploration, technology skills in the workplace, beginning web page design, and introductory flash animation. Utilize this class to determine your future interests in the Information Technology field.

Digital and Interactive Media - 7035 (9-12) (½ credit)

Recommended Prerequisite: Principles of Information Technology

Through the study of digital and interactive media and its application in information technology, students will analyze and assess current and emerging technologies, while designing and creating multimedia projects. The software used for design and creation are Photoshop, Windows MovieMaker, and other emerging applications. The knowledge and skills acquired and practiced will enable students to successfully perform and interact in a technology-driven society.

Web Technologies - 7045 (10-12)

(1 credit)

Prerequisite: Principles of Information Technology

“Do you ever wonder how the internet really works? In Web Technologies you will explore the virtual “world of the “web”! You will learn what the world wide web really is, and the mystery behind how the internet actually works. Students are introduced to basic markup language which is the language that makes the web run, various navigational tools and services of the Internet. We also learn about effective use of graphics, fonts, colors, navigation tools. Students will learn to use Dreamweaver, Flash, Photoshop and Illustrator. Topics include creating web pages, using internet protocols, search engines, file compression/decompression, FTP, email, and more! Upon completion, students should be able to deploy a website created with basic markup language, retrieve/decompress files, email, FTP, and utilize other internet tools.”

Computer Programming I PreAP - 7040 (10-12) Weighted

(1 credit)

Recommended Prerequisite: Principles of Information Technology

Want to learn how to write programs for the computer? What is computer programming? Basically your job will be to instruct the computer to do things. It consists of creating simple steps using the programming languages of C++ and JAVA to get the computer to perform specific tasks. These tasks will manipulate different types of objects such as numbers, words, and simple graphics. Use this introductory programming class as a foundation for many computer, mathematics and engineering related fields at the postsecondary level. It will enhance logical problem solving skills while creating programs to perform business, math, and science related tasks.

Computer Science Advanced Placement - 7060 (11-12) Weighted

(1 credit)

Recommended Prerequisite: Computer Science I Pre-AP

Extend your knowledge of JAVA! Earn credit for college by taking the AP exam. This course will provide you with the knowledge and concepts needed to be successful in postsecondary majors that require analytical problem solving skills and sound programming abilities. Course content includes in-depth coverage of all basic programming techniques as well as object-oriented methods and common data structures for storing and manipulating data.

Animation - 8535 (10-12) (1 credit)

Prerequisite: Principles of Information Technology

Learn Adobe Flash to add animation, video, and interactivity to web pages. Utilize the techniques used in the animation industry including animating still images and text, and importing video. Work with the Toon Boom software widely used in the industry to produce cartoon animation.

Web Design - 7080 (10-12)

(1 credit)

Prerequisite: Web Technologies

This course focuses on web design using XHTML and other authoring tools with emphasis on meeting current W3C standards. Students will also learn about important design concepts, form creation, basic scripting, and publishing. There will also be an introduction to web graphics and animation.

Business Information Management I - 7020 (9-12)

(1 credit)

Recommended Prerequisite: Touch System Data Entry

Computer technology is everywhere today- Smart phones, Tablet PC's, laptops, desktops and the list goes on! Students will gain technical and business skills much needed in today's driven world. This course is designed to help students develop keyboarding skills and introduce you to some of the latest word processing, presentations, and spreadsheet applications. The class will focus on Microsoft Office applications. You will learn Word, Access, Excel, Desktop Publishing and PowerPoint. You will also have the opportunity to learn about the internet and the world wide web, as well as how to “build” your own webpage!

Independent Study in Technical Applications (Computer Science) - 8560 (12)

(1 credit)

Prerequisite: Teacher Approval, Computer Programming I Pre AP, and Computer Science Advanced Placement

This course is for students who would like to broaden their IT skills by exploring and utilizing data structures that enhance data intensive programs. In addition, students enrolled in this class are expected to participate in UIL competitions on a regular basis.

***Law, Public Safety, Corrections, and Security
Manufacturing
Science, Technology, Engineering, and Mathematics
Transportation, Distribution and Logistics***

See the Del Mar College, CTE / Dual Credit Section of the Course Description Guide

***Career and Technical Education
Career Development Cooperative Programs***

This work-based instructional arrangement develops essential knowledge and skills through classroom technical instruction and on-the-job training in an approved career and technology training area. This course introduces students to general employability skills and concepts including human relations and personality development, business ethics, management principles, business communications, basic computer applications and personal and business management. In addition, each student will have an individual training plan that will address the necessary skills and knowledge needed for that student's specific career training.

Students who are planning to take a cooperative program should read the following important notes.

Notes: The cooperative program includes one hour of class instruction and a two hour work pass for on-the-job training each day. A minimum of fifteen hours work per week is required.

Due to state requirements, seniors without previous cooperative work program experience will not be admitted into the program at mid-term. Application for the cooperative program is available from the teacher. Complete and return the application to the cooperative program teacher.

Career Preparation I - 9080 (11-12)

(2 - 3 credits)

Prerequisites: 16 Years of Age & Teacher Approval. Recommended: Keyboarding

Career Preparation I provides opportunities for students to participate in a learning experience that combines classroom instruction with paid business and industry employment experiences and supports strong partnerships among school, business, and community stakeholders. The goal is to prepare students with a variety of skills for a fast-changing workplace. This instructional arrangement should be an advanced component of a student's individual program of study. Students are taught employability skills, which include job-specific skills applicable to their training station, job interview techniques, communication skills, financial and budget activities, human relations, and portfolio development. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success

Career Preparation II – 9090 (12)

(2 - 3 credits)

Prerequisites: 16 Years of Age & Teacher Approval. Recommended: Keyboarding

Career Preparation II develops essential knowledge and skills through classroom technical instruction and on-the-job training in an approved business and industry training area. Students will develop skills for lifelong learning, employability, leadership, management, work ethics, safety, and communication as a group; however, each student will have an individual training plan that will address job-specific knowledge and skills. Approved training sponsors will provide paid occupational training for a student. The training sponsor will assist the teacher in providing the necessary knowledge and skills for the student's specific career preparation.

**DEL MAR COLLEGE
WORKFORCE PROGRAMS - DUAL CREDIT
2015-2016**

THESE COURSES ARE AVAILABLE TO BE TAUGHT AT DEL MAR COLLEGE – WEST CAMPUS AS DUAL CREDIT CLASSES IF A SUFFICIENT NUMBER OF STUDENTS ENROLL TO WARRANT HOLDING THE CLASS. SOME OF THESE CLASSES CAN ALSO HAVE ONLY A MAXIMUM NUMBER OF STUDENTS (VARIES BY DEPARTMENT).

HUMAN SCIENCES AND EDUCATION DEPARTMENT

Career Cluster: Human Services

Cosmetology 1

(2 high school credits) PEIMS# 13025200

An introduction to the field of cosmetology, including Texas Department of Licensing and Regulation cosmetology statutes and rules. Fall semester is a course in the basic fundamentals of cosmetology. Topics include safety and sanitation, service preparation, manicure, facial, chemical services, shampoo, haircut, wet styling, and comb out. Spring semester continues with presentation of the theory and practice of nail services. Topics include terminology, application, and workplace competencies in nail services.

Student will be financially responsible for uniform, state license fee, and miscellaneous personal supplies.

(8 Del Mar College credits: Fall CSME 1405 Fundamentals of Cosmetology, Spring CSME 1443 Manicuring and Related Theory) Assessment Levels R1 E1 M1

Cosmetology 2*

(2 high school credits) PEIMS# 13025300

Fall begins with introduction to the theory and practice of haircutting. Topics include terminology, implements, sectioning, and finishing techniques. The spring semester begins with an overview of the procedures and operations as related to salon management. Develop procedures for appointment scheduling and record management; identify issues related to inventory control and operational management. Theory and practice of skin care is introduced, identifying the terminology related to skin treatments, demonstrating the proper application and exhibiting workplace competencies in skin care.

Prerequisite: Cosmetology 1.

(7 Del Mar College credits: Fall CSME 1310 Introduction to Haircutting and Related Theory, Spring CSME 1244 Introduction to Salon Development & CSME 1248 Principles of Skin Care)
Assessment Levels R1 E1 M1

UPON SUCCESSFUL COMPLETION OF Cosmetology 1 and 2 the student can continue with the intermediate and then advanced levels in the College program.

GOOD READING COMPREHENSION SKILLS NECESSARY FOR COSMETOLOGY COURSES.

RESTAURANT MANAGEMENT / CULINARY ARTS

Career Cluster: Hospitality & Tourism

Restaurant Management

(1 high school credit) PEIMS# 13022400

A study of personal cleanliness; sanitary practices in food preparation; causes, investigation, control of illness caused by food contamination (Hazard Analysis Critical Control Points); and workplace safety standards. National Exam will be administered at course completion. ServSafe Certification is possible with passing score.

Student will be financially responsible for uniform and miscellaneous personal supplies and fees.

(3 Del Mar College credits: Fall course CHEF1305 Sanitation & Safety)

Assessment Levels: R2, E2, M1

Culinary Arts

(2 high school credits) PEIMS# 13022600

In the fall, study of the fundamental principles of food preparation and cookery to include Brigade System, cooking techniques, material handling, heat transfer, sanitation, safety, nutrition and professionalism. In the spring, fundamentals of baking including dough, quick breads, pies, cakes, cookies, tarts, doughnuts. Instruction in flours, fillings, ingredients. Topics include baking terminology, tool and equipment use, formula conversions, functions of ingredients and the evaluation of baked products.

Student will be financially responsible for uniform and miscellaneous personal supplies and fees.

(6 Del Mar College credits: Fall CHEF1301 Basic Food Preparation, Spring PSTR 1301 Fundamentals of Baking)

Assessment Levels R1, E1, M1

Hospitality Services

(1 high school credit) PEIMS# 13022800

Fundamentals of recruiting, selection, and training of food service and hospitality personnel. Topics include job descriptions, schedules, work improvement, motivation, and applicable personnel laws and regulations. Emphasis on leadership development.

Student will be financially responsible for uniform and miscellaneous personal supplies and fees.

(3 Del Mar College credits: Spring RSTO 1313 Hospitality Supervision)

Assessment Levels R2, E2, M1

Chef 1305 and CHEF 1301 are taken concurrently in the fall and are prerequisite for PSTR 1301 and RSTO 1313 which are taken concurrently in the spring.

GOOD READING COMPREHENSION & BASIC MATH SKILLS NECESSARY FOR FOODS COURSES.

INDUSTRIAL EDUCATION DEPARTMENT

Career Cluster: Transportation, Distribution and Logistics

Automotive Technology

(2 high school credits) PEIMS# 13039600

Introduction to automotive industry including automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, professional responsibilities and basic automotive maintenance. Second semester is overview of automotive electrical systems including topics in operational theory, testing, diagnosis,

repair of charging and starting systems, and electrical accessories. Emphasis on electrical principles schematic diagrams and service manuals.

(8 Del Mar College credits: Fall AUMT 1405 Intro to Auto Tech; Spring AUMT 1407 Auto Electrical Systems)
Assessment Levels: R1, E1, M1

Advanced Automotive Technology

(2 high school credits) PEIMS# 13039700

Operation and repair of drum/disc type brake systems. Topics include brake theory, diagnosis, and repair of power, manual, anti-lock brake systems and parking brakes. Second semester is diagnosis and repair of automotive suspension and steering systems including electronically controlled systems. Includes component repair, alignment procedures, and tire and wheel service.

Prerequisite: Automotive Technician I.

(8 Del Mar College credits: Fall AUMT 1410 Auto Brake Systems; Spring AUMT 1316 Automotive Suspension and Steering Systems)
Assessment Levels: R1, E1, M1

STRONG MATH AND GOOD READING COMPREHENSION SKILLS NECESSARY FOR SPRING SEMESTER AUTO TECH I AND ALLOF AUTO TECH II.

DEPARTMENT OF PUBLIC SAFETY EDUCATION

Career Cluster: Law, Public Safety, Corrections and Security

Law Enforcement I

(1 high school credit, 1st fall semester course) PEIMS# 13029300

History, philosophy and ethical considerations of criminal justice; the nature and impact of crime; and an overview of the criminal justice system, including law enforcement and court procedures.

(3 Del Mar College credits: CRIJ 1301 Intro to Criminal Justice
Assessment Levels: R3,E3,M1

Court Systems and Practices

(1 high school credit, 2nd fall semester course) PEIMS# 13029600

Study of the judiciary in the American criminal justice system and the adjudication processes and procedures.

(3 Del Mar College credits: CRIJ 1306 Court Systems and Practices)
Assessment Levels: R3,E3,M1

Principles of Law, Public Safety, Corrections and Security (1 high school credit, 1st spring semester course) PEIMS#13029200

A study of the nature of criminal law; philosophical and historical development; major definitions and concepts; classification of crime; elements of crimes and penalties using Texas statutes as illustrations; criminal responsibility.

(3 Del Mar College credits: CRIJ 1310 Fund of Criminal Law)
Assessment Levels: R3,E3,M1

Law Enforcement 2

(1 high school credit, 2nd spring semester course) PEIMS#13029400

Police profession; organization of law enforcement systems; police role; police discretion; ethics; police-community interaction; current and future issues.

Prerequisite: CRIJ 1301.

(3 Del Mar College credits: CRIJ2328 PoliceSystems&Practices)
Assessment Levels:R3,E3,M1

When not enough high school students enroll to make dual credit pure criminal justice classes, students have option to enroll in online or regular college criminal justice classes instead.

EMERGENCY MEDICAL SERVICES

Career Cluster: Health Science

Medical Terminology (1/2 high school credit), fall semester course) PEIMS#13020300

Required for Emergency Medical Services Professions courses. Study of common medical terminology, word origin, structure and application.

(2 Del Mar College credits: HPRS 1206 Essentials of Medical Terminology)
Assessment Levels: R2,E2,M1

Practicum in Health Science for Emergency Medical Technician – Basic PEIMS#13020500
(2 high school credits, spring semester course)

Preparation for certification as an Emergency Medical Technician(EMT)-Basic. Includes all the skills necessary to provide emergency medical care at a basic life support level with an emergency service or other specialized services. Also includes a basic type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience, and required clinical time is in addition to class time. Students are required to purchase uniforms and equipment and must meet JCAHO requirements. (see EMS section in Del Mar College catalog)

(6 Del Mar College credits: EMSP 1501 Emergency Medical Technician – Basic, EMSP 2160 Clinical)
Assessment Levels: R2,E2,M1

The Texas Department of State Health Services may not allow persons to test to receive certification or licensure if they have been convicted of certain crimes above the level of a Class “C” misdemeanor. Driving While Intoxicated (DWI) or Driving Under the Influence (DUI) arrests or convictions may preclude the candidate from certification, no matter the level of arrest or conviction. Students who have convictions of this nature should contact the program director prior to enrollment.

FIRE SCIENCE

Career Cluster: Law, Public Safety, Corrections and Security

For all individuals who are interested in a career as a fire fighter, this program prepares the student to take the Basic Fire Fighter examination with the Texas Commission on Fire Protection.

One must take the series of courses concurrently to satisfy the TCFP curriculum for Basic Structural Fire Suppression, Course #100.***These courses may be offered only by institutions licensed as a fire academy by the TCFP*** Good physical condition, clean criminal history, and a medical physical are required prior to admittance to the program.

Student will be financially responsible for uniform and rental of firefighting equipment.

Firefighter I

(2 high school credits) PEIMS#13029900

First four of the courses in the series in basic preparation for a new firefighter to satisfy the TCFP curriculum for Basic Structural Fire Suppression, Course #100.

(Fall semester 7 Del Mar College credits: FIRS 1301 Firefighter Certification I and FIRS 1407 Firefighter Certification II and spring semester 7 Del Mar College credits: FIRS 1413 Firefighter Certification III and FIRS 1319 Firefighter Certification IV)

Assessment Levels: R2,E1,M1

Firefighter II

(2 high school credits) PEIMS#13030000

Next four of the courses in the series in basic preparation for a new firefighter to satisfy the TCFP curriculum for Basic Structural Fire Suppression, Course #100.

(Fall semester 8 Del Mar College credits: FIRS 1423 Firefighter Certification V and FIRS 1429 Firefighter Certification VI and spring semester 5 Del Mar College credits: FIRS 1433 Firefighter Certification VII and FIRS 1103 Firefighter Agility/Fitness Preparation)

Assessment Levels: R2,E1,M1

To complete the Basic Firefighter Certificate, students must also complete EMSP 1501 Emergency Medical Technician Basic and EMSP 2160 Clinical after high school graduation. To be hired as a firefighter, a clean criminal back ground check is required.

DEPARTMENT OF COMPUTER SCIENCE, ENGINEERING & ADVANCED TECHNOLOGY

Career Cluster: Science, Technology, Engineering and Mathematics/Information Technology

Electronics

(First year, 2 high school credits) PEIMS# 13036800

Fall semester is a study of the fundamentals of direct current including Ohm's law, Kirchhoff's laws, and circuit analysis techniques. Emphasis on circuit analysis of resistive networks and DC measurements. Spring semester is a study of the fundamentals of alternating current including series and parallel electricity in AC circuits; analyze AC circuits using appropriate mathematical formulas; troubleshoot various AC circuits using schematic diagrams; and apply and interpret basic principles of magnetism.

(6 Del Mar College credits: Fall CETT 1303 DC Circuits, Spring CETT 1305 AC Circuits)

Assessment Levels: R1,E1,M1

Advanced Electronics

(Second year, 2 high school credits) PEIMS# 13036900

Fall semester is an investigation of combinational and sequential logic elements and circuits with emphasis on design and troubleshooting of combinational and sequential circuits. Spring semester is study of diodes, transistor characteristics and other semiconductor devices, including analysis of static and dynamic characteristics, biasing techniques and thermal considerations.

Prerequisite: Electronics and Algebra II.

(7 Del Mar College credits: Fall CETT 1415 Digital Application; Spring CETT 1329 Solid State Devices)

Assessment Levels: R1,E1,M1

STRONG MATH AND GOOD READING COMPREHENSION SKILLS NECESSARY FOR ALL ELECTRONICS COURSES.

PLEASE NOTE: THE DEL MAR DUAL CREDIT CALENDARS MAY DIFFER FROM THE LOCAL HIGH SCHOOL CALENDAR.

Trade and Industrial Education

GPISD will work in partnership with area training and development centers, Institutes of Higher Education, and technical centers to provide opportunities in several skilled crafts and industry related training. As these courses are developed, information will be provided by GPHS counselors to students about course registration. *Note: These courses will be offered at sites other than GPISD.*

Courses may include:

- Welding
- Pipe-fitting
- Plumbing
- Instrumentation
- Electrical
- Construction
- Refinery Operations

Career and technical education programs enable students to continue their education after high school and/or to gain entry-level employment in a high-skill, high-wage job. Your counselor will help you plan a coherent sequence of courses for the career area of your choosing.

Please visit with a counselor or a CTE teacher if you want to learn more about career choices and preparation for those choices.

CTE courses are available to all students without regard to ethnicity, disability, national origin, race, sex, age, or limited English language skills. In addition, supplemental services are available to special population students (disabled, educationally disadvantaged, and limited English proficient) as approved for the students. Approved supplemental services for special populations students may include:

- classroom modification
- counseling and career development activities
- curriculum modification
- equipment modification
- instructional aids and devices
- supplemental materials

Minimum Enrollment All courses available require a minimum enrollment of 10 students for the course to make. Courses which do not meet this requirement may be dropped by administrative decision.

Sequence of Courses Students enrolling in Career and Technical Education courses shall follow a coherent sequence of courses as preparation for a career objective. Students in grades nine through twelve may enroll in a career and technical education course at the specified grade level if they meet individual course requirements. Gregory-Portland ISD follows the guidelines of the Achieve Texas Program. This information can be accessed at www.AchieveTexas.org. Please contact a high school counselor for further assistance.

Employment Opportunities Career and Technical Education will provide students with the opportunity to develop preparatory and marketable skills in their chosen field of study. Upon graduation from high school, the student may:

- attend a college or university to pursue a professional degree in a field related to their high school training
- enroll in a junior college or technical institute to receive more highly specialized training, or
- obtain related and meaningful employment

GLOSSARY OF TERMS

504 PROGRAM Options are available to accommodate students with disabilities as determined by a 504 committee. See your counselor for available options.

ACT college/university entrance exam. Most colleges and universities require either the ACT or the SAT as one of the admission requirements. Students are encouraged to take exams by the spring of their junior year so that early fall of the senior year can be used to refine the scores, if necessary. You may take them at an earlier date for practice.

Alternative Education Courses Credit earned through the Alternative Center for Education (ACE) program will receive regular weight. ACE courses, by U.I.L guidelines, cannot be utilized to obtain U.I.L eligibility.

Articulated Courses Articulated courses are college-level technical courses that allow high school students to earn college credit. Courses may be locally articulated or state-wide articulated.

ASVAB and The Self-Directed Search This test is available to any interested student in grades 10-12. Primary target is the 11th grade student. It is given by the Department of the Defense and does not require any military obligation. The Self-Directed Search inventory is designed to help high school students plan educational courses that have relevance to the world of work and career goals.

Career and Technical Education Courses See Career and Technical Education

Dual Credit/Concurrent Enrollment Junior and Senior students may take certain courses through the institute of higher education for both High School and College credit. Please see the counselors for an Enrollment application. College application must be made and tuition and fees are required.

Dyslexia Program Services offered to students through the DYSLEXIA PROGRAM are available for those qualifying for reading instruction under the dyslexia program guidelines. Contact your counselor for information regarding this program.

ESL Program/English as a Second Language is offered to students, based upon a Home Language Survey and recommendation of the Language Proficiency Assessment Committee. Students who qualify through assessment may receive special English classes and content modifications. Placement in ESL I & II (for state credit) will be determined by the LPAC. Credit in English III & IV must also be earned to fulfill English requirements (4 credits) for graduation.

PSAT This test is given in the fall for juniors, but freshmen and sophomores can take it for practice and information. The results are used in several ways including college course planning to qualifications for college scholarships. Students may qualify as National Merit Scholars during the Junior Year based on the results of this test.

SAT college/university entrance exam. Most colleges and universities require either the SAT or the ACT as one of the admissions requirements. Students are encouraged to take exams by the spring of their junior year so that early fall of the senior year can be used to refine the scores, if necessary. You may take them at an earlier date for practice.

STAAR State of Texas Assessment of Academic Readiness. This is the new state assessment system that will replace TAKS beginning in the school year 2011-2012. For high school students it transitions beginning with first time ninth graders in the school year 2011-2012.

Special Education This program is available for students with disabilities-through the Admission, Review, and Dismissal process. See your counselor for information.

TECH PREP College credit for high school courses may be earned through Tech Prep articulation for certain High School and Regional Technical Center courses at Del Mar College, West Campus. See your counselor for a current list of available courses and application form.

THEA (Texas Higher Education Assessment) The THEA test replaced the TASP for assessing college readiness in reading, writing, and math skills. High school students may take the test when they have passed all portions of the exit level TAAS/TAKS. Students may be exempted from this test by having qualifying scores from the TAAS/TAKS, ACT, or SAT. Students enrolled in Texas public colleges or universities must take the THEA test BEFORE enrolling in any college coursework.
